PRODUCT CATALOG

BAGS COLLECTION

We create a classy range of premium bags collection for both women and men. We repurpose Tyre Tubes, Denim, Fabric and also have an interesting range where we blend these different materials.

All our bags have a clear focus of utility. We use the negative aspect of the material when it is dumped (tough and non biodegradable) to our advantage when we use them as the primary input for our collection. With a clear focus on quality and finish, we invest in the best range of accessories to complement our designs.

Our bags range include tote bags, sling bags, laptop bags, luggage bags.

You got any specific requirement ?
We can collaborate on design and create something just for you !

Flaunt your sustainability quotient in style !

Tyre Tube Range

The classy black rubber is a perfect sustainable choice for accessories.

Also called Vegan leather, the tyre tube material, which is a post consumer waste, gets a new lease of life through our bags collection. Tough while being malleable, the rubber sheet gets transformed into handbags, laptop bags, sling bags, pouches and more.

APPAREL

We work with the excess fabric that is sourced from garment makers and create a contemporary range of apparel for women of today.

Working with natural fabrics like cotton linen, we create a capsule collection that is comfortable and ideal for everyday wear.

Our designs are not seasonal. With a clear focus on slow fashion, we believe that every piece of garment we create gives our customers a beautiful alternative to adopt sustainable designs.

Home Furnishings & Decor

Add a dash of vibrant, joyful colours to your space with the range of Upcycled Home Furnishings.

These are our handloom throws, rugs, cushion covers created by repurposing cotton sarees.

This range can be customized as per your specific requirement.

Since these are created by repurposing cotton sarees, the collection will be in assorted colours.

The Woollen floor rugs are created by repurposing woollen yarn waste. Woven on a handloom, these beautiful rugs bring the yarn waste to life through beautiful patterns woven by our team of young women.

Our Values

We believe that there is nothing called Waste. That is the philosophy of Rimagined.

We realise the need to promote sustainable consumption and we focus on creating products that are aesthetically pleasing while being practical. And all this with no compromise on quality

All the Rimagined products are handcrafted by a well trained team in the backend. Being an ethical brand, we focus on creating a dignified work environment for our artisans.

We believe in fair wages and do not offer deep discounts for a reason. Our labour costs are a major contributor to our product costs and we take pride in that.

Our team includes women who have gained an opportunity to create their identity for the first time, traditional handloom weavers whose craft is struggling for survival, master tailors who have lost their jobs when factories shutdown

We have chosen to touch lives and make sustainable livelihoods the second foundation pillar of the enterprise.
