# Our Handmade Paper Products

---

We have noticed a marked increase in buyers' desire to find ethically and sustainably produced handmade wrapping papers. We are proud to say Globe Enterprise has always sourced environmentally friendly wrapping papers and paper products, as we take left over cotton, a by-product of India's huge garment industry and recycle it into something beautiful, resulting in presents that are enhanced beyond compare.

Our gift bags and gift boxes are made from the handmade wrapping paper range, making them equally environmentally friendly and luxurious.

Our most successful designs have typically been intricate and rich, the type of styles that create a genuine "wow" factor. At the recent Spring Fair, our collection of papers was very well received. The teals merging into dark blues, and coral merging into magenta colourways were particular favourites amongst existing and new buyers. We will launch this new blue, pink and green collection at PG Live in June.
