DISPLAY ACCESSORIES

CANDLE HOLDERS

For the best effect of our lithophane ovals and domes, D026 LED light is highly recommended.

It features 3 modes from brightest and dimmed to flicker, and simply touch the central point to transition in between the 3 modes.

The flicker mode, which imitates how a real candle's flame flickers, is the star feature.

Not only does this avoid safety concerns with fire hazards but it is rechargeable.

What's more, its battery life lasts. Once fully charged, it can stay on the flicker mode for 8 hours, which is plenty under normal use.
