A Hyve Event

Slido Guidelines

Slido is an audience interaction platform for live events which allows for Q&A and polling.

If you would like to use the Q&A and/or the polling function, please do let the Bett Content team know, and submit your poll question(s) and multiple-choice answers by **Monday 7th December 2026**.

Technical Details

We will provide you with an iPad which will be logged into Bett's Slido account. This will allow you to see the questions coming in from the audience and the polling results.

We will switch the AV feed to display the poll on the theatre screen for the audience, but not the live Q&A.

Tips

Introducing Slido at the start is crucial for encouraging attendees to use the tool during your session. A Slido QR code will be shown on screen before you presentation and we would encourage you to signpost this at the start of your session.

- Direct them to the platform: It is useful for you to include the Slido joining instructions on a slide in your presentation. General instructions are:
    - Scan the QR code or enter slido.com in a web browser
    - Enter or select #Bett2027
    - Select the correct theatre/session title. The options are in a drop-down box on the right of the screen

If you leverage Slido well at the start, it will encourage people to continue using it. If neglected, attendees might refrain from posting questions later.
