# I / ABOUT TEXPRO Corp

**TEXPRO CORP** a branch of Kassab Group, is a textile manufacturer since 1983 located in Tunisia in the EUR-MED zone. Texpro Corp was founded with the association of European partners.

Over the years, **Texpro Corp** has grown rapidly to become a fully integrated apparel manufacturer certified with GOTS and BSCI covering the complete production cycle focussing on sustainability all through the process from fabrics to manufacturing, washing and dying.

The company is specialized in denim and flat garment manufacturing and the product portfolio includes casual dresses, shirts, jackets, pants and coats for men, women and kids.

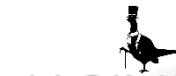

At **Texpro Corp**, we have a longstanding commitment to environmental sustainability. We are increasingly partnering with our customers to ensure high consistent quality on the products and invest on innovation to help improve the environmental impact by consistently delivering responsibly produced products.

We reflect our core values “ATTITUDE, APTITUDE, ALTITUDE” in all what we do.

“35 years of big names ...and attractive as always”

## II/ TEXPRO Corp Services

we offer a large variety of **services** with high **technologies**:

- Creative team that combine between technical skills and creativity, for continuous research and collectionning

## Creative Lab

- In this creative lab you can go through all the below steps and working on collaboration with all the team :

Process : Style definition - Fabric Selection - Pattern handover -

Sewing –

Washing - Finishing

## Cutting Departement

### Fabric inspection system

**Equipment** with multiple options including a meter counter, lighting above and below the fabric to identify all stains and defects meticulously before cutting the fabric.

## Full Automatic Cutting room

**Texpro** Corp has an automatic Fabric Cutting line:

- Best quality
- Performance and durability

**The first Tunisian** company that includes such automatic spreading-cutting line.

## Sewing Departement

---

Our Sewing units are able to produce classic jeans, fashion jeans, chinos, cargo shorts, trousers, skirts, etc. at a very high level of consistency and quality with zero defect.

## High added value Sewing Lines

---

## Washing and deying Departement

---

We're always looking for improvements when it comes to sustainability and quality.

For this reason we are always **investing in new machines and materials.**

## Sustainable laundry

---

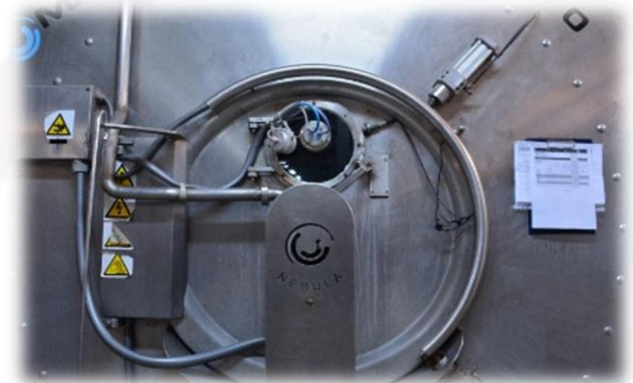

TEXPRO Corp invested in a completely **new sustainable laundry** due to the increasing demands from consumers and a conscious sense of responsibility towards **our planet**.

**70 %** of the required water is **recycled** and used for production again. We install an aquarium to prove the efficiency of this process where fishes can live on a recycled water.

Up to **90%** of water is **saved** by the process. The facilities are well equipped with technologically advanced washing machines.

A lot of water is needed in the dyeing and finishing process. To reduce the use of water, power and chemicals, make use of **laser washing techniques**. It increases the fabric **strength** by **50%** and the **workplace efficiency** by **500%**

The **Ozone technique** can be used to replace finishing processes. When using the Ozone technique, **water, power** and **chemical savings are huge**.

# III/ TEXPRO Corp advantages
