Milestones in our journey

Over the past 20 years,
we've achieved many milestones...

2001

Jan 2001 - Establishment of Polyking

Founded in Xiamen city, Polyking was born out of an era of rapid economic development of China.

2004

Sep 2004 - Founded of Archilles & Polyking (factory)

As production demand increased, Xiamen Archilles & Polyking (the factory) was set up in 2004.

2007

Apr 2007 - Expansion

Six years after strating the business, we have our own five-storey factory building. With 5 production lines and more than 200 exprienced workers, Polyking was under repid development.

Milestones in our journey

Over the past 20 years,
we've achieved many milestones...

2015

Sep 2015 - Self industrial park

To meet the increasing production demand, Polyking built an industrial park in Anxi, Fujian Province, which would be officially put into use in 2021.

2017

The construction of the industrial park began - including five independent factories, covering an area of more than 20,000 square meters.

2021

Polyking's self industrial park is officially put into use in 2021.

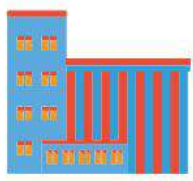

Now

Our Story goes on

“We always regards 'mutual help to mutual benefits' and 'reasonable prices, fast delivery time and good after-sales service' as our target.”

Eric Chen
Founder of Xiamen Polyking

Reliable Production Base

To meet the increasing production demand, POLYKING has built an industrial park covering an area of more than 20,000 square meters.

Senior Sample Development Team

Simply provide us with your choices of various specifications, including dimensions, fabric type, and color, and we will provide you with a quote and a sample.

OEM/ODM Customization Production

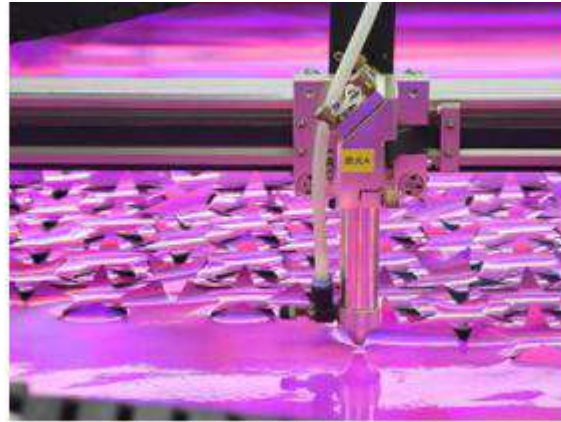

Equipped with a professional sample development team, POLYKING provides a one-stop service from design, sampling, to production.

Complete System of Production & Quality Management

Materials

POLYKING applies various materials and accessories for bags that you can choose from. Our materials all meet European, REACH, and California 65 standards. If the raw materials we have in stock do not meet your customization needs, we can purchase materials that will.

Manufacturing Process

In order to guarantee quality and improve efficiency, POLYKING generally adopts a stamping press to cut fabric. We also have a laser cutting machine to cut materials, ensuring the accurate cutting of materials to make the processed bags and cases more beautiful.

Production Equipment

Our production facility is equipped with a wide range of production processing and quality testing equipment. We utilize cutting equipment, screen printing equipment, needle detectors, and other advanced machinery to reduce the costs for client and produce high-quality products.

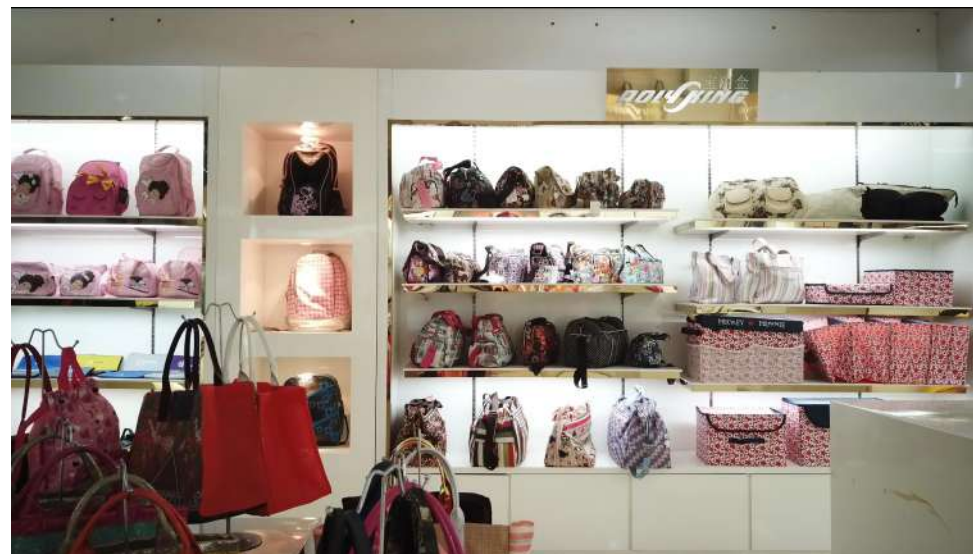

Quality Control

Besides cost, when choosing a supplier of bags and cases, what people care most is the quality of products. When POLYKING produces bags and other products, strict quality testing will be employed in every link from the raw material selection to the final product.

Advantages of POLYKING

The bag production industry is highly competitive and it is difficult to keep up with demands.

POLYKING production services can alleviate these issues by providing high efficiency and high-quality products with your brand attached.

Dependable Production Base

POLYKING is equipped with reliable production base which has been granted SA8000 social responsibility certification and ISO9001 quality management certification.

Various Materials

Wide range of material options, including nylon, canvas, leather, artificial leather, PVC, PU, composite materials, etc.

Self-Owned Printing Factory

We operate our own printing factory where we apply screen printing, sublimation transferring, digital direct injection and other printing methods. We can print various high-grade patterns for clients with excellent printing effects.

Advanced Equipment

The factory is equipped with a computerized sewing workshop to complete the sewing of various fabrics.

POLYKING's 20th Birthday

20 years of staying professional -
POLYKING provides you with high
quality service.
