CASHMERE MANUFACTURER

## US

Quality, natural luxury, and craftsmanship are synonymous with our name and our collection. Respective and preserving the decade-long Nepalese artistry, yet walking together with innovative technology, we can create products true to our art. Based in Kathmandu, Nepal, we have been manufacturing the finest cashmere and pashmina products since 2005.

To respect and preserve the natural resources we have around us and create some of the world's finest luxury, all our products are made using eco-friendly and azo-free dyes respecting our sustainability approach. With over a decade of experience supplying luxury clothing brands globally, today we stand as one of Nepal's most modern cashmere mills.

# WHAT WE DO?

Nepal has long been home to traditional craftsmanship. Cashmere, merino wool, and silk production have been the heart of our production. All of our products go through more than 40 different processes from fiber to fabric. It's not just a product but an art developed from decades of experience and love for quality.

Aiming to show the world the true meaning of craftsmanship, we aim to create products true to their soul, using traditional techniques inherited from generations of innovations, woven together with a modern approach.

# WEAVING

Weaving has always been the Core of our craftsmanship, the art of weaving was inherited from one generation to another in the family. Weft yarn runs horizontally across the fabric and interlocks with the warp yarn, making a raw fabric.

We have two different techniques of weaving, i.e. Dobby and Jacquard. Dobby Looms makes elegant checks, stripes, and our signature felted and diamond stoles, whereas Jacquard Loom makes much more intricate and complicated patterns. Dobby and Jacquard's mechanism is set in traditional Power looms hence the result is an elegant border that is difficult to obtain in modern rapier looms.

## HOW ARE WE DIFFERENT?

Weaving has not only been an art form but a feeling of love and warmth for us. Being the only mill in Nepal, operated by a group of engineers, we are able to create patterns true to its kind. From solid color beautiful scarves to integrated tartans, and home textiles from 20cms to 150cms maximum width we do it all.

**GENERAL MOQ** - 30pcs/style & 5pcs/color

**LEAD TIME** - 28 working days to 45 working days

**COLOR OPTION** - PANTONE SHADE CARD & STOCK COLORS

# KNITTING

Knitting was where it started over two decades ago to cater to the need for luxurious cashmere while keeping the old traditions of knitting alive. The process, which is all done by hand, gives its unique charm to the garment. From the fiber to the finished garment, each step is carefully monitored to achieve perfection.

The workforce mostly of women knitters and menders and their perfect detail to this craft has given us a special place in the cashmere community. We have come a long way and will continue to hone these techniques to build a larger audience. We believe in partnering with like-minded people for the sustainable development of the cashmere industry.

## HOW ARE WE DIFFERENT?

Using different gauges hand flat machines from 1.5 up to 14 gg to make the garment. The short lead time for sample and production is what we are known for. The embroidery and the printing we use along with jacquard knitting give our clients a variety of reasons to trust our work. For complex design, we also use computer knitting to achieve the desired results hence making us a modern-day knitting house.

**GENERAL MOQ** - 20pcs/style/color & 5pcs/size

**LEAD TIME** - 45 working days to 72 working days

**COLOR OPTION** - STOCK COLORS

# PRINTING

Traditionally prints have always been the charm of the fabric. Our product also goes through the hands of the printers to print elegant designs and patterns that add a layer of attraction to the fabric.

We have two types of printing methods, traditional screen print and modern digital print. Screen prints use single-colour screens, overlaid in a fabric one after another to form the design. Digital printing uses sophisticated computer technology to print the fabric as a printer print over paper.

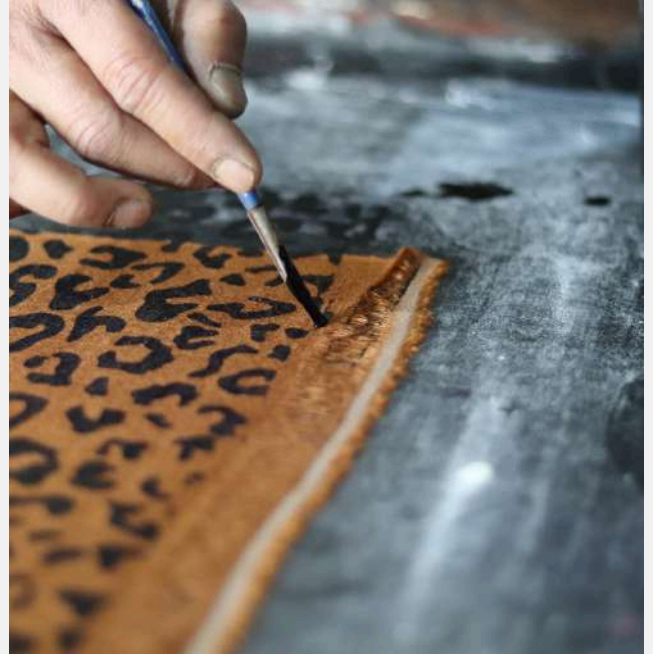

## HOW ARE WE DIFFERENT?

Our aim is not only to print beautiful patterns but also to imprint a positive attitude to nature. Using azo-free dyes, and eco-friendly chemicals, all the prints we do are environment-friendly and sustainable.

**GENERAL MOQ** - 30pcs/style & 5pcs/color

**LEAD TIME** - 28 working days to 72 working days

**COLOR OPTION** - PANTONE SHADE CARD & STOCK COLORS
