FOR A LESS BLACK AND MORE GREEN FUTURE

SOURCETEXTILE emerged in 2006 with Sustainability at its core and devoted to transforming the highly polluting textile industry. Under this mission, the company grew and now collaborates with more than 300 workers, leaving a sustainable footprint through international brands.

We're one of the most certified textile companies in Europe, and we proudly represent the FROM PORTUGAL label by offering to the international market a vertical work system that allows us to produce a wide range of garments.

We are pacesetters in several sustainable innovation projects and have implemented multiple sustainable initiatives withing our company, which led us to be a reference in our sector.

We promise to keep working FOR A LESS BLACK AND MORE GREEN FUTURE
