

COMPANY PROFILE

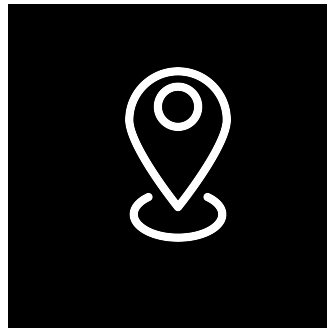

ABOUT US

At South Ocean, knitwear is our passion. We're at the forefront of the global knitwear industry, working as the go-to source for global retailers and brands.

We are product specialists who create beautiful trend-driven knitwear by utilising our extensive knowledge of yarn, experienced technical and manufacturing know-how; leveraging our market intelligence and competitive sourcing capabilities to work for our customers.

With speed and innovation leading the way we work, we use the latest in digital technology and work processes to constantly redefine the knitwear industry. Our diverse range of capabilities enables us to serve customers across a wide spectrum of segments and geographies. Together we strategize and innovate, design and make, envision and execute.

SOUTH OCEAN AT A GLANCE

Hong Kong

Headquartered group with
an international presence

15M
sweaters
made annually

12M
pounds of yarns used annually

130 staff
Asia, Europe & North America

OUR APPROACH : SPEED, INNOVATION, DIGITALIZING

We're all about working with speed. South Ocean Fashion's teams are digitalizing the supply chain through virtual sampling. Working in a co-creation process, we can help you digitally visualize styles with actual yarns and fits, rendering your designs to real-life models. Through this we cut development time down from weeks to hours, providing you with a greater variety of options at lower costs. We're led by innovation. We partner with institutes and innovators to find the latest technologies that produce better materials and knitwear. Alongside this, our extensive trend and market intelligence services include retail reports, runway reviews, and data analytics.

WHAT WE DO AT SOUTH OCEAN KNITTERS

- We **create** and **manufacture** sweaters & snits
- We **design** and **co-create** with our customers
- We **source** and **develop** new yarns
- We **innovate** and are building the world's most extensive **digital** library of yarns, stitches, silhouettes, and images

OUR COMMITMENT TO SUSTAINABILITY

SUSTAINABILITY IS INTEGRAL TO OUR BUSINESS AND WAY OF WORKING

Tracking GHG Emissions

Commit to limiting global warming to 1.5C by 2030 compared to pre-industrial levels. Target to reduce absolute Scope 1&2 GHG emissions by 42% by 2030, and Scope 3 by 25%

Material Sustainability

Currently 75% of our products contain low climate impact elements

Suppliers

Support our suppliers to improve water and chemical managements. To date, 100% of our factories are tracked in Higg FEM

Product Sustainability

Pioneering an index tool to measure product environmental footprint of all developments and orders
