eversown

Where timeless design meets
thoughtful craftsmanship
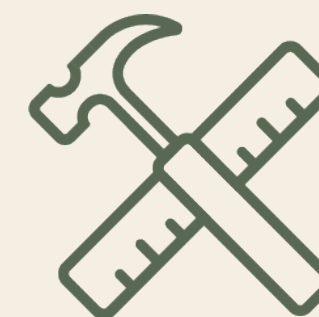

and renewable materials meet
responsible practices.

Your customers deserve comfort with a conscience.

Eversown uses sustainable materials to create elegant furniture that lasts. With simple designs that won't go out of style and thoughtful craftsmanship that won't let you down, we make sure every piece will bring you peace of mind.

SUSTAINABLE COMFORT

We make it easier to do something good for the planet. Our carefully chosen sources and ethical business practices give you peace of mind as you make your space more comfortable.

ENDURING QUALITY

Everything we make is handcrafted to stand the test of time. We use high-quality materials and thoughtful design to ensure that each piece will withstand the rigors of real life, year after year.

TIMELESS STYLE

Trends come and go, but great style is forever. Our products add beauty to any space, in any season, and their simple, refined look grows more beautiful the longer you love and live with it.

Sustainable sources, responsible practices, lasting quality and timeless design.

We make this possible by overseeing the entire process. From the tree seed all the way to the spaces where our furniture is enjoyed, we make sure each and every step is environmentally sound—that's not something most furniture companies are able to claim.

We're not out to be the biggest furniture brand. We're just trying to be the right one. And we hope that by being open, honest, transparent and fair, we can help our partners bring comfort with a conscience to people who share our holistic idea of sustainability.

How We Partner

We are building partnerships with companies that shareour commitment to responsible practices, and the result is that all along the production lifecycle, employees and craftspeople are fairly treated. We give back to the communities we work with, and we wouldn't do it any other way.
