MICROFIBER

HOW MICROFIBRE WORKS

Microfibre is an amazing new fabric that is finding applications in many industries.

HOW MICROFIBER WORKS AND ITS ADVANTAGES COMPARED WITH TRADITIONAL MATERIALS?

HOW IS WORKS: Microfibers attract and hold particles using static action (when dry) or capillary action (when damp).

ITS ADVANTAGES:

- Ultra soft, non-abrasive microfiber cleaning cloths will not scratch paints, vinyl, glass, finishes or other surfaces
- Absorbs up to 8 times its own weight
- Effectively cleans either dry or with liquid cleaners for streak-free and lint-free results
- Reusable and Washable
