

Solacevibe_

Who we are

Solacevibe is a Philippine start-up brand, started as a passion project that rooted from the willingness to create beautiful objects that can give anyone or their space some perk-me-up during what has been a rough time for many. From a hobby that produced macramé coasters, it has developed in to a viable business offering an array of items, and serves as a dependable livelihood. The brand continues to evolve, but it will always be about excellent craftsmanship, unique style, and good vibes through and through. Since then, Solacevibe has partnered with local shoemakers and weavers and sourced locally produced materials from different provinces to use in producing distinctive and top-quality bags and slippers.

Solacevibe_

Our goal:

Solacevibe envisions a future where women feel comfortably beautiful, embracing their uniqueness, and confident with their choices. To do this, Solacevibe supplies its chic and stylish products to partner shops near tourist destinations and major malls in different cities in the Philippines

Pompoms and Fringes

We use cotton macramé cords for the body and fringes for our slipper designs and it can be customized with 60 colors to choose from.

Hand-made pompoms are the big pompoms we use for bags and slippers. They can be color matched with the fringes using cotton indophil yarn.

Our felt pompoms are the small pompoms we use for slipper design such as Bali and Santorini+. We have limited color for this material such as Tiffany, Fuchsia Pink, Pastel Pink, Pastel Blue, yellow, cream, gray and black

A little extra...

Wood beads

We use wood beads as another option, this is a replacement to macramé knots and is a well-balanced embellishment with macramé fringes.

Sea shells

We also use local seashells as one of our main embellishments.

Pearls

We use fresh water as replacement for our extra small wood beads.

Solace + Vibe

Sol•ace; to give comfort

Vibe; a distinctive feeling

This is what we want to share with our clientele, a distinctive feeling of comfort by wearing something that reflects their personality, made consciously with materials that are great with the sense of feeling. At the same time gives out a good vibe as both parties will support local crafters in pursuing their passion for sustainable livelihood.
