QUILTS AND PILLOWS WITH DOWN-FEATHER FILLING

Nature's remarkable down design is light, resilient, soft but ruggedly durable and capable of extraordinary insulating powers. While you sleep, the down clusters contain air to insulate you. Warm air stays close to your body and the cold air stays away. An ideal bedding material – down creates a "natural bed climate", never heavy or bulky, enveloping you in a comfortable cloud of warmth for a deep, restful sleep.

100% cotton downproof fabrics of high quality are used for pillows and quilts covers.

QUILTS, PILLOWS, MATTRESS PROTECTORS AND TOPPERS WITH SHEEP WOOL FILLING

Wool is famous for its breathing and moisture control features; it provides an even temperature at skin level. It is the fiber's remarkable strength and softness that create a pleasant barrier between you and the outside world, allowing you to relax and enjoy a restful night sleep.

Quilts and pillows with wool filling are manufactured using only natural raw materials, combining sheep wool from England and New Zealand together with 100% cotton, 100% organic cotton and cotton/silk fabrics. Specially treated sheep wool is used to produce machine washable pillows and quilts. Wool fiber balls are recommended for pillow filling.

WOOLEN QUILTS, PLAIDS, PILLOWS AND MATTRESS PROTECTORS

Products made of woolen fabrics give you a unique ability to feel the touch of wool itself. Quilts and plaids maintain optimal microclimate for a human: allows body to breathe freely, keeping the warmth, absorbing the moisture and improving blood circulation by micro massage of skin, at the same time.

A large variety of wool content is used in these products – from Merino sheep to camel wool, providing all the best features of each kind. Woolen fabrics may be combined with 100% cotton or other fabrics to get an extra performance.

QUILTS AND PILLOWS WITH POLYESTER FILLING

Polyester fiber is neutral to our bodies, perfectly substituting natural fibers if we need to avoid an allergic. Hollow fiber has improved breathing, insulating and flexibility features, while silicon coating makes articles much softer. Fiber balls are recommended for pillow filling.

A large variety of fabrics may be used with these fillings, leading to wide spectrum of choice – with desired performance, design and easy care.

ORGANIC COTTON OUTER FABRIC

All of us know all good features of cotton. Each day we come in contact with it – we wear clothes, use towels, sleep on bed linen, pillows and duvets made from cotton fabrics. Organic cotton is same good as cotton but it has one big feature – it is eco-friendly. Organic cotton is grown without using any pesticides, toxic and synthetic fertilizers - nowadays it is very important for all environment.

BED LINEN

Our offer for comfortable sleep is natural bed linen, made of 100% cotton fabrics; Sateen and plain weaved, bleached and printed, satisfying your need for a soft touch. Other fabric may be used as well, giving rightful choice option for our clients, those who search for more.

FLAME RETARDANT QUILTS AND PILLOWS

Our made quilt and pillows from flame retardant materials are suitable for using in ships. 100% cotton flame retardant or 100% polyester flame retardant fabrics could be used for those products.
