RPET series: that is, the material is made from recycled plastic bottles

As we know, the problem with plastic is a global problem that concerns us all. The products made of this material usually have a very short useful life but take hundreds of years to degrade, which leads to environmental pollution.

Therefore, Twinkling Star handbag joined the fight against excess plastic in the oceans since 2018 to produce the RPET bags. We would like to do our bit by presenting our range of environmentally-friendly items made from recycled polyester material from PET (RPET) plastic bottles to appeal the concerns.
