# Brief Introduction

The former company was a production base that specially produced all kinds of riveter, wrenches, spare parts for cars, plastic spare parts and gardening tools of Japanese, French, British, Germany, American and some other style. It has been mainly engaged in exporting of hardware in more than twenty years' time. On the fast changed market, the company decided to display a complete new look to the customers in 2025 in order to ensure our customers' long-term support: excellent quality, economical price and considerate services in time; persistence on our Managing Identity Honesty and Credit.

The company has the ability of designing, molding, pressing and casting, injection, rush press into shape, forging, cutting process, spraying lacquer, inspection and assembly. The production facility is complete as the inspection devices. The company consists on the aim "Quality First, Credit Supreme" and persistently pursues technology innovation and development of new products to satisfy domestic customers' need, so that it is thought highly by the customers. On the purpose of further developing international market, welcome customers at home and abroad to visit, guide and cooperate!

Packing	Inner ctn/outer ctn(pc)	G.w/n.w(kg)	Pack measurement(cm)
DOUBLE BLISTER	6/24	24.2/22.8	46.5X39.5X37.5

**To install Blind Rivets (3/16", 5/32", 1/8" or 3/32"):**

1. Drill proper sized hole for rivet you are using.
2. Select and install correct Nose piece (11,12,13 or 14).Nose pieces have standard right hand thread for installing/removing.
3. Place rivet in the hole and place Nose piece over stem of rivet.
4. Squeeze handle once or twice until stem snaps off rivet.
5. Open handle and turn tool upside down to allow stem to fall out.

**To install Nut Rivets and Rivet Anchors, you must change the Case. Rivet Nuts and Rivet Anchors use the same Case.**

**Changing the Case:**

1. Remove any installed Nose piece by turning it counterclockwise.
2. Hold Pivot Pin (8) against handle to prevent it from turning. Loosen Pivot Pin Nut (9) by turning it clockwise with Wrench (4).
3. Squeeze Lever (2) down and pull it back along Frame (1). This will disengage Lever (2) from Axis Pin (19).
4. Remove Jaw Case (15) from tool.
5. Insert Nut & Anchor Case (20).
6. Push Handle back in place, being sure that Case Pins fit into Handle slots.
7. Push Pivot Pin (8) back in place and retighten it with Wrench (4).

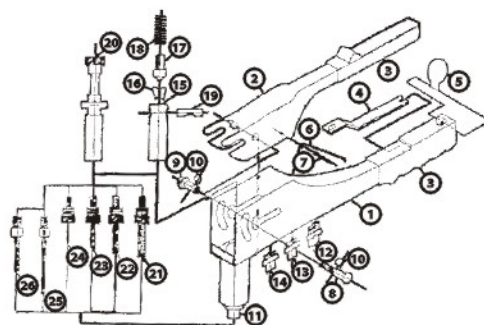

**To install Rivet Nuts (1/4"-20, 10-24, 8-32 or 6-32):**

1. Drill proper sized hole for Rivet Nut to be used.
2. Thread proper Nut Mandrel (21, 22, 23 or 24) onto Nut & Anchor Case (20).
3. Thread Rivet Nut onto Mandrel.
4. Insert Rivet Nut into hole and squeeze handle. This will expand Rivet Nut in hole.
5. Unscrew tool from Rivet Nut.

**To install Anchor Rivets (6-32x1-1/4" or 6-32x2-3/8"):**

1. Drill proper sized hole for Anchor Rivet to be used.
2. Thread proper Anchor Mandrel (25 or 26) onto Nut & Anchor Case (20).
3. Thread Anchor Rivet onto Mandrel.
4. Insert Anchor Rivet into hole and squeeze handle. This will expand Anchor Rivet in hole.
5. Unscrew tool from Anchor Rivet.
