## THE SCENTS OF ÉTERNEL

We have carefully selected the scents you will find in the Éternel series. We have selected scents that we ourselves love and, which gives us associations to wonderful memories. We have fallen in love with 6 different scents - and of course the variant without perfume, for you who prefers the pure option.

Scents are made up of singular notes: top, middle and base notes. Together they create an aromatic symphony. Top notes are the first impression of a scent. Then the middle notes will take effect as the top notes fade. At last, the base notes will commence and keep lingering.

**Find your own favourite scent – or choose to love them all...**
