SR Mailing

Zero waste packaging by 2025 is a big vision for us but we are committed and confident we can make it happen!

Having already made sustainable packaging the norm for over 9,000 eCommerce businesses...

we know we can do it!

Sustainable, Responsible and determined to reduce our impact on the environment. SR Mailing has seen the vast amount of waste generated by the eCommerce industry and is dedicated to make a change!

Our mission is to adopt a zero-waste concept that considers the complete lifecycle of a product from collectable materials all the way to end-of-life disposal, completely abandoning the idea of a linear economy.

Recycled content is one of our main fortes when developing our product line. We also work with Climate Partner to make our products carbon neutral - the first being our grey mail bag range!

Scan me to see the offset of CO2!

CONTENTS

Cardboard Boxes

CARTONS, BOXES AND POSTAL BOXES

The widest choice of sizes and formats.
- Single wall for lighter products.
- Double wall for heavy or fragile products.

Plastic pollution is one of the greatest environmental challenges facing the world today.

We are proud to announce we now source our own recycled LDPE pellets for our factories in China. Our process now involves exporting collectible materials for recycling into 100% recycled environmentally friendly mail bags.

Completing the cycle in recycled plastic products.

249,430 kg CO₂
have been offset

Supported offset project
Hydropower
Virunga
DR Congo

SR Mailing Ltd

Currently 95% of our products are earth-friendly. We offset 249,430kg of carbon emissions via the Hydropower project in Virunga, DR Congo. ID: 15019-2103-1001

Product Carbon Footprint

LDPE Mailing bag

ClimatePartner

ClimatePartner calculated the carbon emissions generated by one kilogram of a *LDPE Mailing bag* on behalf of SR Mailing Ltd based on the „Greenhouse Gas Protocol Product Life Cycle Accounting and Reporting Standard" (GHG Protocol).

For the calculation, the "cradle-to-customer plus waste" approach was used, meaning that the life cycle phases included are the extraction of raw materials and packaging, relevant logistics, manufacturing, delivery to the customer, and the disposal of the product and its packaging.

Product details	Value
Unit weight [kg]	1.0

Overview	Emissions (g CO_2)	Share (%)
General emissions	362.0	14.5
Production process	400.0	16.0
Raw materials	560.0	22.5
Packaging	20.6	0.8
Inbound logistics	360.7	14.5
Outbound logistics	55.1	2.2
End-of-life	735.9	29.5
Subtotal	**2,494.3**	**100.0**

Share of carbon emissions

- End-of-life - 29.5 %
- Raw materials - 22.5 %
- Production process - 16.0 %
- General emissions - 14.5 %
- Inbound logistics - 14.5 %
- Other - 3.0 %
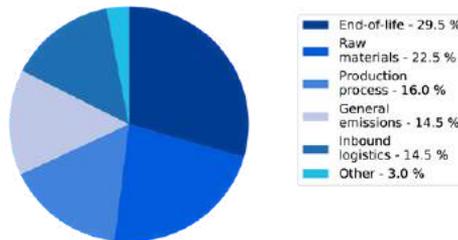

With a quantity of 1,000 kilogramms, CO_2-emissions amount to 2,494.3 kg CO_2. This is equivalent to...

...a distance of
7,746
km by car

...a total amount of
2,682
washing cycles at 60°C

...the carbon sequestration of
200
beech trees

we'll find a way to make it!

Manchester

① MANUFACTURE

With a number of factories across the UK and China, we are the only company to operate a closed loop manufacturing process, from recycled waste to the manufacture of new products.

② UK BASED

With offices and warehouses in the UK, we are on hand to answer any questions, deliver your goods next day and meet your overall needs.

③ PRICES

Are you a retailer? A reseller? A wholesale buyer? Ask if you could benefit from any of our bulk manufacturer to business (M2B) prices!

④ QUALITY

Products that leave our factories are subject to rigorous quality checks to ensure that only products that meet our high standards are dispatched to you.

⑤ STOCK LEVELS

We Dispatch 1 to 2 containers of goods each week from China; to ensure that we have sufficient stock all year round!

⑥ Showroom

We are currently one of the only packaging companies that has a walk-in retail store and show room!

We offer hands-on expertise, try before you buy and free samples!

Packaging Recycling Guide

Although there's no formal legislation to say you have to print information on to your packaging, (unless it's food-related) to say what material it is, we think it's good business practice to be help your customers recycle by including the appropriate packaging symbol for the material type.

Plastic Resin Identification Codes -

PETE	HDPE	PVC	LDPE	PP	PS	OTHER
Polyethylene Terephthalate	High-Density Polyethylene	Polyvinyl Chloride	Low-Density Polyethylene	Polypropylene	Polystyrene	Other
Widely recycled	Widely recycled	Not commonly recycled	Medium	Not commonly recycled	Not commonly recycled	Not commonly recycled

And for paper -

20 PAP	21 PAP	22 PAP	23 PPB
Cardboard	Mixed Paper magazines	Paper letters, printer paper	Paperboard

- ♻ **100% Recycled Cardboard Boxes**

- ♻ **100% Recycled Mailing Bags**

- ♻ **100% Recycled Postal Packaging**

- ♻ **100% Recycled Paper Wraps Void Fill**

- ♻ **80%-100% Recycled Polythene & Labels**
