Fargro believes in responsible sourcing of all its products. Fargro are members of Sedex and have completed a full ethical trading audit. All prices quoted in this catalogue are correct at the time of going to print.

All prices quoted exclude V.A.T. and delivery. Prices may be subject to alterations due to changes in raw material costs, freight rate and exchange rate fluctuations. All prices are subject to a minimum order value. Distributors reserve the right to amend prices accordingly if minimum order values are not reached.

Please visit our website at www.fargro.co.uk for any price changes. Whilst we do our best to provide accurate information regarding measurements and colour descriptions, there may be variation for some of these products due to the manufacturing processes involved. FLOW POT

GO WITH THE FLOW

A system that works

Flow Pot is a global initiative that uses innovative, environmentally friendly plastic derived from ocean bound and post-consumer waste.

Flow Plastic is ethically-sourced using various suppliers that collect, sort, and sanitise discarded plastic so that it may be given a second life in the form of these beautiful pots.

Through careful deliberation and rigorous quality control, we've created a balanced mixture that ensures the familiar quality and consistency associated with CTi.

Horti-Wrap Machine™

The Horti-Wrap™ Machine employs a simple concept to wrap Danish trolleys with most kinds of film.

Trolleys are pushed onto the turntable and as this is manually rotated, the film is wound around the trolley as it moves up the 2m mast, wrapping the trolley from the base to the top.

Movement is controlled by foot pressure on the base plate. Using large machine-size rolls of film reduces costs compared to hand wrapping.

Blocking Discs

With blocking discs, you easily secure Danish trolleys, auction carts or CC containers. Once you put a caster in the hole of a disc, the cart will no longer move/roll, which makes applying wrapping film to the cart an easy task.

The blocking discs can easily be transported or placed thanks to their simple design. The bottom is equipped with anti-slip, and the extra steel rings prevent them from sagging.

LED-Lighting

LED-Lighting experiments in a controlled environmental chamber show that plants grow better under conditions replicating a clear sunny day than when only exposed to blue and red light. Therefore the spectrum has been adjusted to imitate this. LED lights introduce the latest technology in lighting culture.

LED lights produce little warmth and need no extra cooling. This makes them very energy efficient. The output voltage is 48 volts.

The combination with the IP65 waterproof rating makes the LED lights 100% safe, even under the most difficult conditions.

Automatic Water System

The Horti-Grow is equipped with a fully automatic water system. The system is based on irrigation whereby the water trays automatically fill with water at the time set by you.

Various internal trials with sprouts, baby leaves, lamb's lettuce, arugula, strawberries and even tomatoes have proved very successful. The Horti-Grow also allows you to grow herbs entirely according to your wishes.

Trolley & Sack Trucks

Strong, well made trolleys for movement of containers and heavy items safely and securely around the nursery.
