## BUILD PLAY LEARN

### ECO-FRIENDLY TOYS & CRAFTS

I am delighted to present our innovative S.T.E.M toy range from The Toy Tribe.

With over 50 years of high-quality manufacturing experience, we've worked passionately over the last few years with our eco-conscious values strongly rooted into everything we do, to develop a range of plastic-free toys and crafts.

Our aim from the start was simple - to inspire children and families to reduce their screen-time, awaken imaginations and spend some quality time together!

That's why we make sure all of our toys & crafts encourage time away from devices to build, play and learn! All whilst gaining an appreciation for nature, through eco-friendly materials from a collection that is proudly plastic-free.

James Martin

# CATAPULT CHAMPIONS

## CATAPULT TARGET GAME

Young engineers will love this STEM-inspired game, where they will have great fun building the catapult themselves! Keep all of the family entertained for hours, with a 3-in-1 bonanza of games! Build your catapult and shoot through the hole, knock down targets, and challenge other players!

Containing both characters Hercules and Goliath and 12 paper balls to blast, see how far they can fly in the air! Get all of the family involved as all ages will enjoy the competing against each other in endless challenges.

- Easy assembly, with instructions included
- Fires paper projectiles!
- Eco-friendly: made from recyclable cardboard
- Sturdy design: guaranteed to last
- Ideal for children aged 4+
- Perfect for any room, as well as outdoor play
- Designed and manufactured in Dorset
- Single and double packs available
- CE certified

The Toy Tribe journey began creating toys to Build, Play and Learn from. Striving to use minimal plastic, inspire creativity and spark curiosity.

In our pursuit to create a sustainable planet, we carefully consider each step of production with the aim of minimizing our environmental impact, making play not only fun but also eco-friendly.

Designed, manufactured and shipped from Dorset, we ensure to create a positive impact on the environment through our products, employees and wider community.
