NATURE

CREATED BY NATURE

**Plasma ions
are how nature
cleans the air.**

**SCIAIRE AIR PURIFIERS
GENERATE IONS TO
ELIMINATE 99.9% OF GERMS
INCLUDING SARS-CoV-2.**

Where does plasma exist in nature?

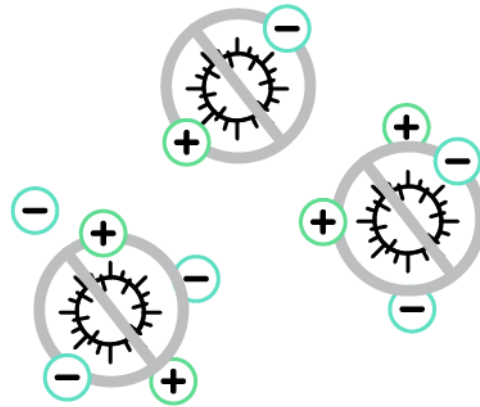

AIR INSIDE BUILDINGS AND HOMES HAVE THE LEAST AMOUNT OF PLASMA IONS. SCIAIRE BRINGS THE OUTSIDE IN.

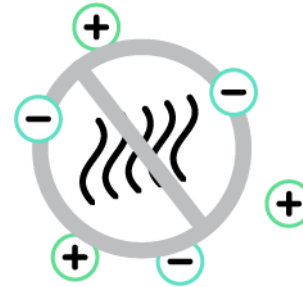

How does plasma work?

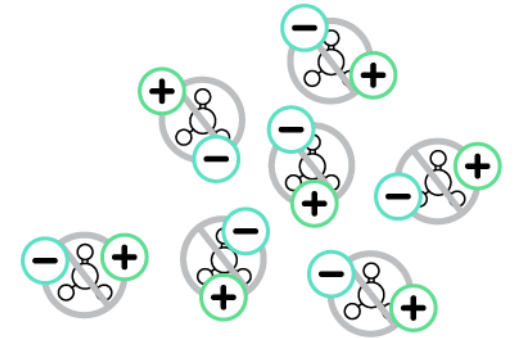

Airborne particles are charged by the ions causing them to cluster and be caught in the filters

Viruses and bacteria bond with oxygen ions and become inactivated

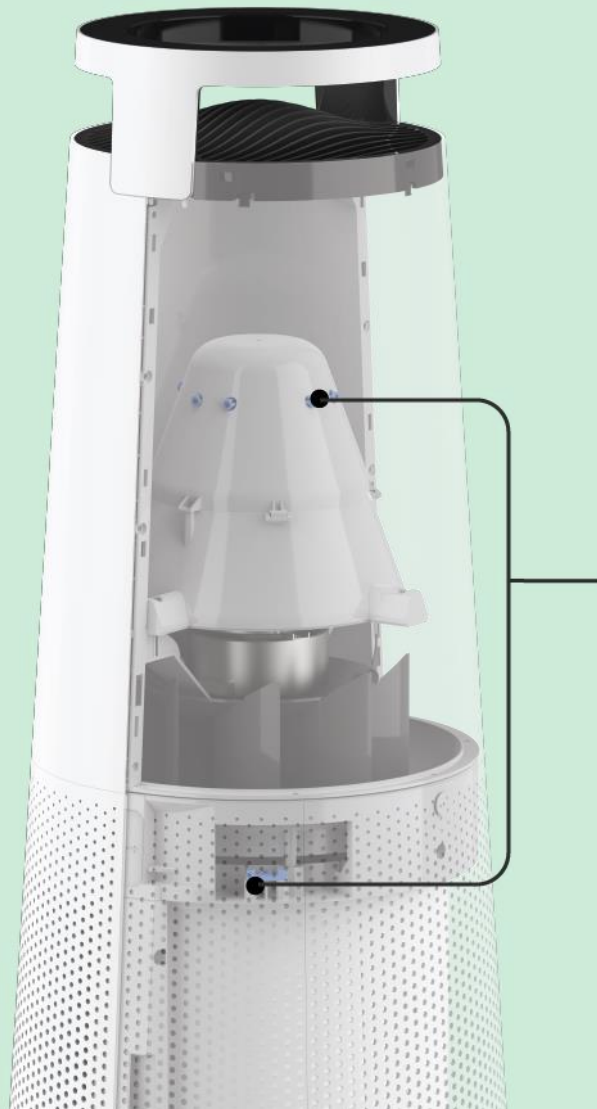

Numerous aerosols and odorous gasses oxidize with oxygen neutralizing ions

Oxygen ions react with VOCs breaking down their molecular structure
