. . . bringing a bit of Christmas sparkle to the humdrum.

THE SPARKLERS

NEW DESIGNS FOR 2024

▲ Sparklers

A sophisticated Frost-effect film lining the lamp splits up the light from the dozen internal warm white LEDs into a myriad points of light which then frame a variety of Winter scenes, giving a bright glistening frost effect to the entire lamp. The high-quality moulded glass has a thin layer of an iridescent film, and this discrete rainbow sheen is enhanced by the two-tone light from the LEDs which display gentle shades of lilac and gold throughout the sparkling frosted landscape.

Specifications

- 3 sizes available – 20, 17.5, 15cm
- Iridescent tint
- Glistening frost-effect
- 10 - 12 Bright White LEDs
- High quality moulded glass
- 6-hour daily-repeating timer
- 3 x AA batteries required

Prices	1+	8+	16+	24+

Small	4.60	4.35	4.05	3.80

Star film - Winter Forest
Medium - 17.5cm

Snow film - Cosy Cabin
Medium - 17.5cm

Frost film - Deer Park
Medium - 17.5cm

TWO NEW DAZZLING HOLOGRAPHIC FILMS NOW ADDED TO OUR SPARKLER RANGE

Joining our existing Frost film range are a new set of Sparklers, each lined with one of two new special effects films that split the light from the LEDs either into an array of shining Stars or gleaming flurries of Snow.

Star film – here the white LEDs shine as a cluster of 3-dimensional stars floating in the bright moonlit scene of a Winter Forest, whilst the multi-coloured LED version show the stars in a colourful riot of bright, pastel shades suspended in space.

Snow film – the Snow film splits the LEDs into a glittering array of beams of light, like flurries of snow enveloping the Cosy Cabin mountain scene. A choice of elegant bright white or four vibrant colours.

Frost film – hundreds of thousands of tiny prisms on the Frost-effect film refract the light from the LEDs into a sea of glistening points of light, like sun on freshly falling snow. See the page opposite for more about these.

GLASS TWINKLERS

With a similar manufacturing process to the Snowies mentioned elsewhere, the Glass Twinklers retain the highly reflective metallic silver paint applied to the outside of the glass, which then has the laser-etched design burned off it to take it back to the plain glass through which the amazing light display can be seen.

A dozen LED beads flash 7 different colours independently whilst scrolling through 3 randomly-varying flashing speeds, the light from which is multiplied many times over by the endless internal reflections that fill the lamps with a kaleidoscope of colour. Lovely enough in the light, in the dark they project a wild and ever-changing and ever-changing and colourful display onto nearby surfaces.

Now with the new 'Snowflakes' design in soft Gold

Specification:

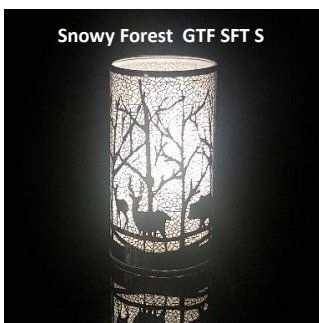

- Laser-etched design
- Multiple reflections
- Image projection
- 12 internal LED beads
- 7-colours in each LED bead
- 3 random sequential flashing speeds
- High-quality moulded glass
- 6-hour daily-repeating timer
- 3 x AA batteries required

Glass Frosty Twinkler

Closely related to the Twinklers above, the Frosty Twinkler has flashing white LEDs, and the inside of the lamp is lined with the same glittering frost-effect that we use in the Snowies and Sparklers in the preceding pages. The pulsing light show is framed by a laser-etched Winter Forest design in a metallic silver finish. 6/18 hr timer included.

THE SNOWIES

Snowies ►

An inner layer of silver paint is applied to the glass to reflect the light back inside the lamp, and this stops it from being absorbed by the outer layer, a choice of either elegant satin-effect Christmas Crimson or Forest Green. Then the design is burned off by laser back to the glass to reveal the bright white light from the dozen or so internal LEDs. The final touch is to line the inside of the glass with a frost-effect film to give a glittering, icy sparkle to the whole scene.

Santa, Christmas Crimson

Shadow Lamps

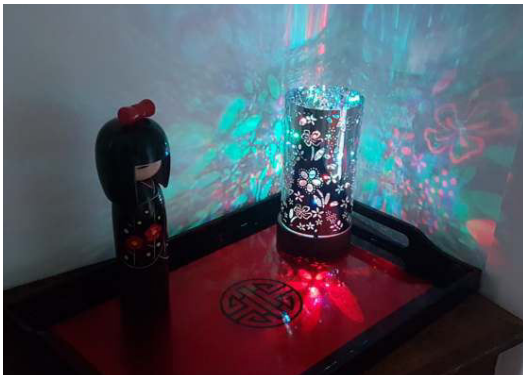

Shadow Lamps by Luxa are a highly unusual and attractive LED lamp with hidden images that only come to light when the lamp is turned on. The thick laminated card shade is printed both inside and out to show a gentle, peaceful design when the lamp is off, but something rather more interesting and active when turned on. The Shadow Lamps have an option of three lighting modes - continuous, gentle pulse or a tea light flicker. The Shadow Lamps can be run off the mains with the 2m USB cable supplied or with 3 x 'AA' batteries (not supplied).

▲ Flamelights - Braziers

A wide range of the most realistic silk flame-effect lamps on the planet – a choice of four intricately etched designs, three different styles and variations of silver, black or copper. A perennial Winter favourite for an eye-catching and irresistible display, perfect for the cold, dark and miserable Winter months.

◀ Firelamp: FL 001

The Firelamp is the central flame-making console that goes inside all of our flamelights. It is available separately for use as a merchandising tool for seasonal or in-store displays. Perfect for bringing unused wood-burning stoves and lonely hearths to life.

or **Red LED Version: FL 001 R**

This has a string of red LEDs around the base to give a hot glow to its surroundings.

FROSTY FANTASIA TWFFAN

FANTASIA TWRFAN

FROSTY WINTER TWFWIN

WINTER TWRWIN

▲ Frosties

The Frosties variation contain a set of sequentially flashing warm white LEDs whose light is diffused through a sophisticated textured film to give a bright, sparkling frosted effect to the acid-etched designs.

3 designs: City, Winter and Fantasia.

▲ Frosty Twinklers

A hybrid of the Frosties and the Twinklers, the Frosty Twinklers use the same frosted diffuser foil of the Frosties together with the colourful Twinkler LED format. The effect is a bright and sparkling ever-changing multi-coloured display shining through the cut-out patterns of the lamps.

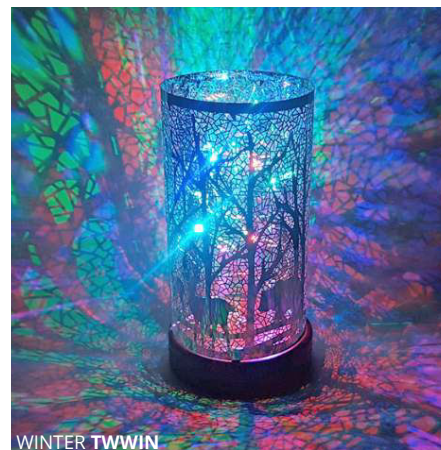

3 designs: City, Winter and Fantasia.

FANTASIA TWFAN

FLOWER TWFLO

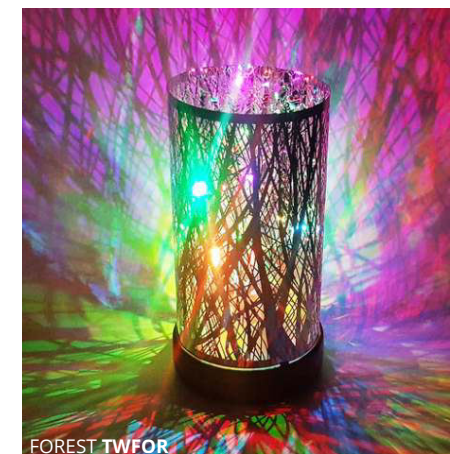

WINTER TWWIN

◀ Twinklers

The Twinklers are a really cute and colourful flickering lamp by daylight, but in a dark environment they turn into something really rather special. There are 6 different colours in each LED and these blend into many more shades, and the polished interior multiplies the number points of light many times over to give a very busy and colourful effect indeed. The ever-changing patterns and colours thrown onto nearby surfaces is quite entrancing.

PRICES
