

We originally launched our own brand back in 2018 with a small selection of ceramics to compliment the textiles from Raine & Humble's ranges. Since then we've expanded our best selling ceramics range and added in glass, brass and vintage wooden pieces which all layer up with our other brands beautifully to create a unique offering to our customers which can be beautifully curated for your own clients.

Ali & Megan design all our pieces, each one created not only to be beautiful but also with a purpose; working with small artisan makers around the world to craft pieces that have a truly hand finished feel.

We believe style shouldn't cost the Earth and it's our opinion that we as a business have a responsibility to make sure our products are made ethically and as sustainably as possible and we strive to improve upon our practices to lessen our negative impact upon the planet.
