

Social Sharing to drive Meeting Requests

Get more meeting requests from LinkedIn and other social platforms by sharing your partnering profile externally.

- 1 Navigate to your profile by selecting **My Company**, from the left navigation panel and Click the “Share” icon to generate your shareable profile link.

- 2 Paste your link along with a note to say you're partnering at the event into LinkedIn, X or your preferred social channel. You can also share this link via email.

i When a partner clicks your shared link, they'll be taken straight to your profile in BIO Partnering with a pre-selected meeting request to your company, making it faster & easier to connect!
