Practical Village

Thursday 20 March	09:30-17:00	Including:
Friday 21 March	09:30-17:00	<ul style="list-style-type: none"> › Suturing › Cytology › Ultrasound
Saturday 22 March	09:15-15:30	<ul style="list-style-type: none"> › Dental radiography › Tube feeding › Closed system chemo devices

Strategies for practice efficiency

Coming soon to the programme, these sessions will focus on the skills needed to lead and manage practices effectively. Designed for practice leaders, decision-makers, and managers, they offer practical tools to optimise technology, staffing, and resources. Explore strategies for change management, team engagement, and performance measurement to drive success across your practice or group of practices. Keep an eye on the Congress website for session details coming soon.

Creating a sustainable veterinary practice

In partnership with Vet Sustain, these sessions will explore the key aspects of building a greener, more sustainable practice. From using parasiticides responsibly in clinical practice to greening your operating theatre, they'll provide practical solutions for sustainability in everyday veterinary care. Learn how to build a green team for the future and understand the importance of sustainability certifications and accreditation schemes. Stay ahead of the curve with strategies that support both your practice's clinical excellence and its environmental impact. Check out the Congress website for more information.

Delivering learning that reflects your needs

To meet the evolving demands of veterinary practice and cater to different learning preferences, we've refreshed our formats for 2025. From expert lectures and hands-on practical sessions to interactive workshops and engaging symposia, this new approach will enhance your learning experience. With sessions focused on both individual skills development and team-based learning, every session is designed to reflect real-life practice and help you grow in your role.
