

WOW TAP

Warm Outside Water Tap

Bringing a warm water supply from inside to outside!

- A standard 'Hoselock' type fitting is included with WOW Tap so that standard hoses and pressure washers can be used.
- The warm water supply is protected by a fully insulated housing, providing frost free protection in accordance with all current UK water regulations.
- The Temperature Mixing Valve (TMV) can be adjusted to the desired temperature*.

* Recommended maximum temperature 48°C to comply with UK Building Regulations and prevent the risk of scald injuries.

PLEASE NOTE

It is recommended that this product is installed by a professional plumber. The TMV and internal plumbing fittings are not supplied with this product.

Perfect for hosing down pets, cleaning cars, filling paddling pools, holiday properties (washing off wet suits and body boards etc.) and more
