- Comes with our detachable steel crank handle as standard
- Ideal for retro fit with Plastica Commercial reel systems

# Commercial Gearbox Converter Kit

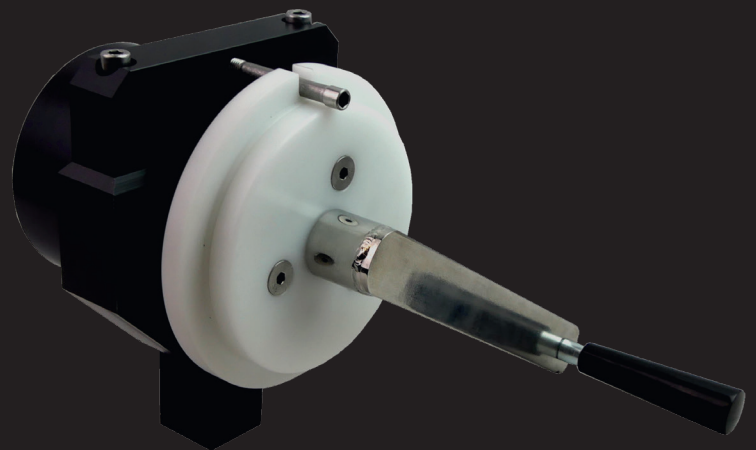

A Retrofit 3.5:1 Reduction Gear Box for Plastica Commercial Swimming Pool Cover Reel System

- Safe & easy to use
- Maintenance free
- Neat & compact
- Simple & effective
- Recommended for covers over 140m<sup>2</sup>

Whatever size the pool, winding a cover can be hard work. Motorised systems are a great option, but the high cost can be prohibitive. In addition, the mechanics needed to make them work means they can often look large and cumbersome, not enhancing the look of the pool.

## An Innovative, Affordable Solution

The Reduction Gear Box has been created to make these concerns a thing of the past. It is a simple, highly effective 3.5:1 ratio gearbox which makes light work of winding the cover onto the reel. It has been specifically designed to be retrofitted to the Plastica Commercial Reels, making it an affordable option for everyone.
