MyCheckr

Biometrics by Innovative Technology®

MyCheckr performs anonymous age estimation, to assist with the sale of age restricted goods.

U25

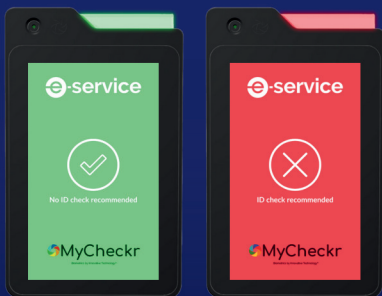

Please be prepared to show ID when buying alcohol
drinkaware

It is a simple, low-cost solution that helps the server make informed decisions during the age check process.

- All-in-one device, no integration required
- No data stored, GDPR certified by Age Check Certification Scheme ACCS
- Local processing with instant results

How it works:

Device clearly shows the server if a manual ID check is recommended

The person in front of the camera is 25 or over

The person in front of the camera is under 25

No internet required

No recurring fees

World leading accuracy

Ai Age Estimation Technology is the Vape Industries, tried and tested solution that is already being used by many Vape companies across the UK.

Prevent underage sales

A deterrent to stop underage customers attempting to purchase age registered goods

Enhance customer experience

Helps reduce potential abuse when challenging customers for ID

Meet licensing objectives

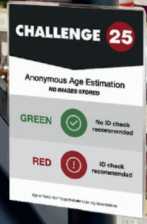

Helps secure licences in accordance with the UK Licensing Act 2003 objectives; protecting children from harm; preventing crime & disorder

Did You Know:

The Association of Convenience Stores Crime Report 2022 found 'enforcing an age restricted sales policy' is one of the top triggers for violence against staff.

MyCheckr can help avoid these confrontations

e-service

Combine ICU Lite with any USB camera for a completely off-line age estimation solution that gives immediate results

ICU Pro

Visit Product Page here:

Our edge solution performs processes locally (no other PC required), with an internet connection only needed for set up and updates. ICU Pro offers an accurate (99.88% LFW*) precise and affordable facial recognition system to automate access control.

Our non-intrusive spoof detection gives the highest level of security, constantly monitoring users without the need for intervention.

Link ICU Pro with any USB camera(s) to automatically trigger peripherals that control access to buildings, safes or specific machinery.

To crack down on underage sales, the government will also bring in new fines for shops in England and Wales which sell vapes illegally to children. VapeHQ, has exemplified the successful integration of MyCheckr within their retail establishments. Helping minimise confrontation and abuse against staff whilst following the Under 25 rule.

MyCheckr gives our staff more confidence to ask for ID when a customer is flagged as underage. This surprisingly low priced tech is a great addition to our store and is already deterring minors trying to purchase vapes. This extra layer of protection further strengthens our defences to stop vapes getting into the hands of under 18s.
