Construction

Founded on extensive experience within both the outdoor and ropes course industry, we offer a one stop shop for a combination of services which are tailored to the needs of the client.

This includes both private and public sector clients such as outdoor centres, schools, organisations, holiday parks and much more.

All of our constructions includes:

- Free site visit
- Help and advice to guide you through the process from conception to building and then support and technical advice in the operation of your course
- Construction techniques/materials guaranteed to meet European Ropes Course Standards (EN 15567+A1:2020: part 1)
- Operational and safety documentation compliant with EN 15567+A1:2020: part 2
- Inaugural Inspection
- Free follow-up periodical inspection undertaken after the first year of operation
- Staff training.

Maintenance

We pride ourselves on our consultancy and support skills – building lasting relationships with the companies we assist.

- We undertake small part repair and replacement
- Carry out major course re-wire and pole replacement
- Design and manufacture new or replacement parts.

Inspections

Technical Outdoor Solutions can provide your ropes course with both inaugural and periodical inspections, as well as PPE checks. These inspections are completed by our qualified and certified staff members. We can then provide inspection certificates through ERCA, LEAPS or ADIPS.

Training

We deliver an independent training and assessment programme for you and your staff on how to both manage and instruct on all types of ropes courses.

We deliver up to date industry leading courses for instructors, rescuers, and facilities managers. For convenience, we can provide staff training at your own site as well as from our Penrith based training centre.

- Traditional Ropes Course Instructor
- Low Ropes Course Instructor
- Adventure Park Instructor
- Temporary Low Ropes Constructor & Instructor
- Rescue
- Bespoke Site-Specific Training
