LEISURE RANGE

# Euro-Plus™ Playpen Balls

The widest range of sizes & colours in the world to suit all needs

Euro-Matic is the world's largest and most versatile manufacturer of hollow plastic balls. We have been manufacturing playpen balls in Europe and the USA since 1969. Our experience is unrivalled throughout the industry.

## Balls Sizes and Range

We supply the widest range of Playpen Ball sizes available. Smaller Therapy™ Balls for children provide excellent physical support whilst giving more tactile and visual stimulation in a 50mm and 60mm. The standard ball diameter available are the Euro-Plus™ Regular 75mm. We stock a huge range of colours as standard on next day delivery and offer custom colours and printed jobs for events, promotional branded jobs and themed nightclubs/bars.

## Materials

The constituent materials that go into making our Playpen Balls are all FDA-approved. From the colourants through to the Low-Density polyethylene plastics, materials are chosen carefully to ensure the balls conform to stringent U.S. and European flammability and toxicity legislation to achieve TUV accreditation.

## Guarantee

Because of our strict quality control and rigorous testing procedures, we offer a two-year guarantee against splitting or breaking under normal use however you can expect them to last much, much longer. We also offer ball collecting and cleaning machines, ask for more information.

## Quality

We never take the quality of our balls for granted. Our Euro-Plus™ Patented Technology (U.S. Patent No. 5320887 and granted Patents in Europa) produces Playpen Balls of a quality recognised as the industry standard all over the world.

During manufacturing, we create an environment harder than any ball pool will ever experience. Randomly selected samples often get removed from production and compression tested to 50% of their diameter. The balls are expected to survive at least 20,000 compressions. The strength and survivability of Euro-Plus™ Playpen Balls are second to none.
