REQUIREMENTS

BioBeds and BioFilters is the solution for pesticide handling areas on farms. It's a proven low-cost method for on farm treatment of pesticides which leads to keeping pesticides out of main water courses which reduces the impact on aquatic life and drinking water.

D&H Direct offer a range of BioFilter system kits to suit your budget and requirements.

- ✓ **Self build system**
- ✓ **Installation kits, pipework and fittings included**
- ✓ **Available from stock**

BioBox is a well suited system for undercover spray fill areas or where there is less than 15,000 litres being passed through the system each year including rain water.
