What can Barcham Trees offer?

Site Consultation

Here at Barcham Trees we offer a Site Consultation Service specifically designed to cater for your tree planting needs.

Choosing the right tree can be quite a daunting process, there are so many different species and cultivars available on the market these days. Whether you have a brand new site that needs some landscaping, or an existing site that needs a refresh, our team would be delighted to bring your vision to life.

Our service is friendly and personal to you, we will visit your site by appointment, discuss your specifications and wishes, assess the site conditions, your soil type and all relevant aspects of the proposed planting area in detail.

Once all the information is collated, we can produce a quote, tree list and plan for your consideration. *The key for us is to help you.*

Why Choose Barcham Trees

Barcham Trees has specialised in the production of containerised trees for 35 years and have supplied over two million trees across the UK.

We grow our trees in our field unit before harvesting them into our patented Light Pots for sale the following planting season, by which time they have a root system geared for success and rapid establishment. We have 225,000 trees in production each year based at our nursery in Ely, Cambridgeshire. We don't buy trees in from other nurseries to supplement our orders, our stock availability is subject to what we have grown ourselves.

Our team are highly trained, with many educated to a degree level in arboriculture. We are happy to offer you advice to help bring your vision to life, with a wealth of knowledge regarding species, screening, planting and more.

At Barcham Trees we strive to deliver quality trees that are bound for successful establishment once planted. Behind our stunning trees are our strict policies and environmental commitment. We are proud to say we have achieved Plant Healthy, ISO 45001 and ISO 14001 certification:

Certificate Number 17587

PHCS - 0003 - UK
