

Griffith Elder

Portable Weigh Beams

- ⚙️ **Fully portable** weighbridge, with no ground works required. A **cost effective solution** that can be moved with telehandler & trailer, total weight less than 2 tonnes
- ⚙️ **Accurate to within +/-1%**
- ⚙️ Complete **operation is simple, unmanned**, & driver can stay in the cab throughout the process
- ⚙️ Suitable for **remote locations** with no mains power
- ⚙️ **Designed for farm use**, specifically for weighing tractor / trailer combinations to know the yield per field and quantity delivered to store. Suitable for small and large scale farms
- ⚙️ **Durable and Robust**, suitable for harsh environments

About Us

- Providing solutions **focused on farming** and the **agricultural sector** ⚙️
- 40+ years of UK design**, manufacture and service, all provided **in-house** ⚙️
- Guaranteed support** for the product during its long life ⚙️
- Operation is always **simple and logical** reducing operator training and error ⚙️
- Long-term solution** weighing systems, working for years with minimal maintenance, resulting in **lower cost of ownership** ⚙️
- Customers are guided** through the complete process, Griffith Elder pride themselves on a continual high standard of service support ⚙️

The WB6 Indicator and Printer

The **WB6 indicator and printer** stores tare (empty vehicle) weights in its memory, showing, and printing gross, tare and net weights, date, time and ticket number.

Has an **accumulated net weight total memory**, so individual batches can be accumulated. The indicator has a memory **capacity for 10,000 weighings** with serial number, date and time.

Generate Excel Reports

All Records and Batch Totals are saved to the **WB6 internal memory**, printed and saved to a USB memory stick as a csv file, so that the harvest information can be put straight into a spreadsheet and **provide yield per field or store totals** in the office.

Key Features

Large LED display with traffic light guides the driver through the weighing process. The **Part, Gross and Net weights are displayed** for the driver giving them the information and confirmation the record has been saved without leaving the cab.

The **WB6 indicator and printer: tough waterproof suitcase** for ease of moving.

RFID remote FOB button system, Automatic weighing with the press of a button. Records saved with vehicle ID and Net Weight carried using pre-stored tare weights.

Why Choose Us

**Griffith
Elder**

Our Services

Griffith Elder care about our customers and pride ourselves on the level of service we provide. Our solutions will provide automation, improve efficiency, save time & money, and ensures no loss of data.
