# PROTECT YOUR MACHINERY

with unique **Datatag** forensic marking

We are authorised installers of **Datatag**, an electronic transponder that is designed to be hidden on your machine. Each transponder has a unique identification code. A hand-held scanner used by the Police reads these codes, meaning the owner of the machine can easily be identified, even if all other identification numbers (chassis number etc) have been removed.

**KING OF  
QUADS**

# KINGQUADS BUILT FOR THE TOUGHEST CONDITIONS

**Every Suzuki KingQuad is packed with technology, from the 500X to the 750XPZ.**

Each model offers the ideal balance of innovative technical specification, toughness and handling for riders on hill farms, lowland farms, estates and equestrian properties, to name but a few areas of use.

Suzuki has been building ATVs for over 30 years, they are technologically innovative and designed with end users in mind. They produce ATVs that work as hard as you do, day in and day out. Offering versatile traction, simple controls and reliable manoeuvring, they're designed to take the hard out of a hard day's work.

## KINGQUAD 500

Toughness combined with easy handling, with 4-wheel drive, fully independent suspension and an advanced engine braking system, it has true off-road capability. Thanks to an updated chassis and suspension, the new Suzuki KingQuad 500 can tow loads up to a market-leading 600kg. The improved chassis means better handling and a more comfortable ride.

## KINGQUAD 750

The most innovative and exciting Suzuki ATVs to date, the new KingQuad 750, is the new King of Quads. Built tough for every ride, this new model achieves a higher level of balance between practical use and leisure riding. The new edgy new styling and leading technology are the result of 30 years of engineering expertise and boast a huge variety of new features.

# Proven Precision

Achieve germination rates of up to **96%**, the highest germination rate in comparison to other systems

**Tried and tested technology, the grass seed is delivered very precisely with two sharp discs that cut a V-shaped slit in the ground.**

Revered in the global agricultural sector the Vredo Agri Series has a highly accurate mechanical seed distribution system and progressive spring guards. These robust but precise machines are very suitable for dairy farmers and agricultural contractors to provide the fields with lush grass in the spring, after the first cut or in the autumn.

The wide Agri Twin has the highest capacity to optimise grassland at the right time. This overseeder is ideal for those who need to

overseed many hectares per annum. The Vredo Agri Twin is available in two widths of 4.4 meters and 5.8 meters.

The Agri Air is perfect for smaller pastures with slopes or undulating terrain. Extremely stable and manoeuvrable, the Agri Air features a pneumatic hopper which channels the seed directly to the cam wheel. Changing seed types and resetting the reliable calibration are done in the blink of an eye.

# 96%

THE HIGHEST GERMINATION RATE IN  
COMPARISON TO OTHER SYSTEMS

# BOOMER™ The Ultimate Power Tool

Natural, comfortable operation, whether you choose an open platform or the Boomer™ cab, your comfort is built into the design.

Compact tractors designed around you, ready for a wide variety of chores, step up to a deluxe Boomer™ Compact Tractor. Regardless of the horsepower, transmission, or operator package you choose, you'll find Boomer™ tractors are free from clutter and are easy to operate. Their exceptional power, manoeuvrability and simple maintenance make them an ideal choice.

With their higher power and performance, whether you use your tractor to maintain a few acres of land, or you depend on it to make a living, Boomer™ compact tractors will deliver. In all, there are five models ranging from 35 to 55 horsepower. As a rule of thumb, the more work you do in a typical week, the greater the horsepower you'll want.

## More Power And Less Fuel With Every New Holland Boomer™

Turbocharged, electronically controlled, common-rail direct fuel injection increases the power, torque and fuel efficiency of Boomer™ engines while complying with stringent Tier 4B emissions regulations.

### A completely automatic emissions system

Boomer™ engines meet tough Tier 4B Final emissions standards with automatic emissions treatment systems that use a combination of internal Exhaust Gas Recirculation (EGR) and a Diesel Oxidation Catalyst (DOC) with a Diesel Particulate Filter (DPF).

### Constant engine speed made easy

With Engine Speed Management, you can set, save, and recall an engine speed with the push of a button. This feature simplifies your work with PTO-operated implements by maintaining a constant engine working speed for you. It's a feature found on larger New Holland tractors, and now it's a standard feature on Boomer™ compact farm tractors.

### Exceptional drivetrain efficiency

To make you more productive when using implements powered by the rear or mid PTO, Boomer™ compact tractors are designed with drivetrain components that provide maximum PTO horsepower while minimizing engine power loss.

### Well-equipped for inclement weather

To ensure fast starts in cold weather, Boomer™ compact tractors come equipped with a quick-heating glow plug and a heavy-duty 660 CCA battery that provides plenty of cranking power.

Superior battery charging and the capability to handle the higher demand of additional electrical accessories is provided by a 70-amp alternator.
