THE FORCE BEHIND HYDRAULICS

## ORIGINAL EQUIPMENT MANUFACTURERS

Our commitment, dedication and experience will help transform your requirements into reality.

Visiting exhibitions displaying modern machinery is an interesting experience.

Look closely at these machines and very often, Hydrokit have been involved.

No matter what this involvement is: component, kit or complete “Made to Measure” solution, our customers can be assured they have received the best possible service.

We understand your requirements and ideas.

We transform these into a project.

The project is developed into a solution.

We present our solution to you.

Hydrokit remain by your side as the reality is fulfilled.

Cylinder protection

Pedestrian detection

Weeder Pilot camera

## HYDRAULIC AND ELECTRIC COMPONENTS

For several years now, many businesses have experienced disruption to traditional supply lines.

Hydrokit stock premier hydraulic and electric brands.

Significant reasons why Hydrokit is the perfect supply partner.

- ▶ 25,000 references on stock available for immediate despatch.
- ▶ Portfolio of 90,000 kit or components references

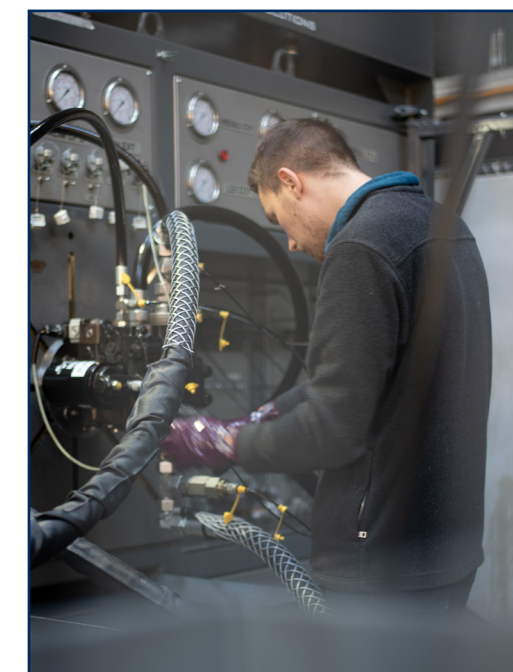

## PISTON PUMP AND MOTOR REPAIR

A specialist department within Hydrokit with a team of 6 technicians.

Hydrokit has 35 years of piston unit service repair experience.

- ▶ Large stock of spare parts
- ▶ 6 months warranty on serviced products
- ▶ Certified repair centre

## HOSE AND FITTINGS

Hydraulic hoses are the hard-working veins and arteries of the hydraulic circuit.

It is vitally important machine performance isn't compromised by poor quality hoses and fittings.

We supply premier quality hose to various specifications, diameters and spool lengths.

A bar code system is available to simplify the re-ordering of inserts and ferrules.

Add to this hose protection, clamps and a range of hose manufacturing equipment, you have a complete hose and fittings solution at your fingertips.

## WORKSHOP ESSENTIALS

In the workshop, construction site or field, today's technicians must diagnose faults efficiently and accurately.

Machine downtime brings pressure to get wheels or tracks turning again.

Our range of flow, pressure and electrical test kits take the guesswork out.

Add to this filtration, oil & grease dispensing, contamination management and much much more.

The result is a one stop shop to kit out your workshop and service vehicles.

# VENSYS GROUP

Founded by Jacques Audureau, the strength of the Vensys Group is the unique synergy between the companies contained within it.

The group can harness a multitude of skills with cooperation across all entities. His vision continues to provide lasting benefits to customers operating in different industry sectors worldwide.

Established in 1980, Hydrokit is part of the Vensys Group. A family-owned organisation with headquarters in Vendee, France. Our President Sophie Renner is the 3rd generation and leads the organisation, taking over from her father Jacques Audureau in 2020.

## GROUP ACTIVITIES

Hydraulic professionals supplying hydraulic & electro-hydraulic kits, components & test equipment for mobile machinery.

- ▶ Design offices for hydraulic and electric projects.
- ▶ Repair of piston pumps and motors.
- ▶ Subsidiaries in UK, Germany and Spain.

Design & manufacture of welded assemblies across all market sectors. Industry, Marine...

- ▶ For example, boat lifts.

A renowned company in construction machinery modification.

Design & hydro-mechanical transformation to improve hydraulic and mechanical performance.

- ▶ For example: Demolition, Long Reach, Materials handling equipment.
- ▶ Improvements to operator safety : Cab protection.

A brand of Soerma TP, Easy Grader is a unique, compact grading machine for small / medium sized grading applications.

- ▶ Designed and manufactured in-house. Transportable on a trailer.

Development of robotic technology integrated into machinery applications.

Provide hydraulic and electric training.  
Undertake specific / Research and Development projects.

A company specialised in the trading of hydraulic components : cylinders, pumps, motors, valves.....
