

# Agricultural Machinery.

We support the agricultural industry by protecting assets, machinery and operators. Tractors, combines, loading machinery, and road vehicles all have fire risks, that we can reduce with our systems. The heat, fuels, and crops involved in farming increase these risks.

- ✓ The overheating of engine components.
- ✓ Long hours and minimal downtime.
- ✓ A buildup of dust and debris.
- ✓ Lack of maintenance.

Our **P-Mark SPCR 199** and **ActivFire AS5062:2016** approved fire suppression system is available to protect your assets and can be complemented with a range of additional safety features. We are proud to partner with **NFU Mutual**, meaning you could be entitled to a discount on your premium.

More than

**800**

agricultural fires during  
the 2022 harvest.
