

DSM COMMERCE

Integration to webshop

Welcome to DSM Commerce - a webshop solution that is easy to learn and get started with. An integrated webshop that ensures your customers first-class online shopping with fast and accurate updating of data and full synchronization with DSM

Should DSM COMMERCE be your future online business?

Our webshop goes beyond the standard functions and allows your company to offer a wide range of advanced functions that are available around the clock.

With support for multiple languages and currencies, you can reach a global audience and even drive international growth if you so desire.

Receive your first order already in 4-6 weeks

It takes so little time for the majority of our customers to be up and running with a tailored webshop. Take control of your customer journey and create a better customer experience at the same time with DSM Commerce.

80%

of customers aged 16-74 have
shopped online within the
past 3 months

Experience the difference with JMA - we digitize machinery dealers

Team up with JMA who is your digital strategic advisor specializing in digital solutions to optimize your business processes, improve inventory management, strengthen service management and deliver accurate financial reporting. We take care of everything from technical installation to cyber security and hosting, so you can focus on running your business.

Quotations for machines and product catalogues

- Possibility to request quotes for customized machines increases direct engagement with potential customers
- Simple construction of product catalogs with user-defined categories and variants makes it easy for customers to find desired products

Digital succes

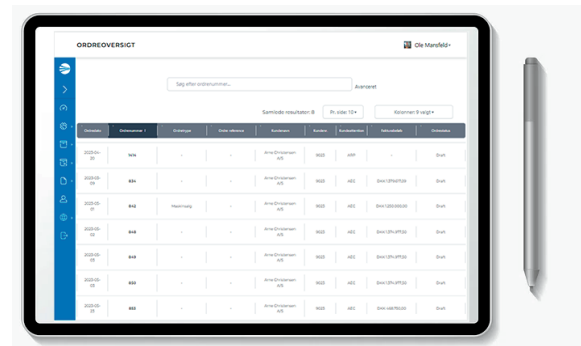

- Expand with more languages and currencies to the international market and reach your customers across borders
- Price changes are displayed in real time on your webshop

Quick basket function

- Easy ordering of spare parts via the "quick basket" function, ensures efficient maintenance and support
- Easy access to technical documentation and electrical diagrams for trouble-free operation, improves the customer experience

Create customers directly from DSM

- Automatic creation of customers from DSM to the webshop saves time and reduces manual processes
- Possibility of personal and exclusive customer experience with login requirements, promotes the building of dedicated customer communities
