Team up with JMA who is your digital strategic advisor specializing in digital solutions to optimize your business processes, improve inventory management, strengthen service management and deliver accurate financial reporting. We take care of everything from technical installation to cyber security and hosting, so you can focus on running your business.

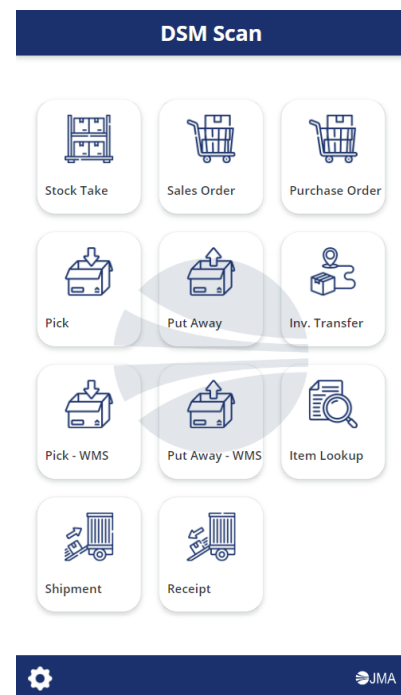

WHAT IS DSM SCAN?

DSM SCAN can be used to scan spare parts for sales and purchase orders as well as to create and finalize sales and purchase orders.

DSM SCAN is a module for the DSM system and is available as an app on all smartphones where the camera can be used to scan barcodes.

It is possible to purchase a casing for selected smartphones that provides the same functionality as a traditional PDA scanner and thus achieve higher precision when scanning barcodes.

DSM SCAN is fully integrated with DSM and is built on the Microsoft Power Apps platform. This ensures that DSM SCAN is always updated with reliable data.

Contact

If you have questions or ideas for DSM SCAN, contact our sales team at JMA on phone number +45 8711 0000 or email sales@jma.dk.
