Shearwell Data itself is both a farming business and a family business - farmer-owned, based on Exmoor in Wheddon Cross, Somerset.

We started up in 1992 with a big idea, a huge drive and a small number of people manufacturing identification tags for livestock. Since then the company has grown consistently and rapidly, now incorporating livestock management programs, visual and EID tags and readers, software and handling systems.

We provide a complete system to help you benefit from your data

## Shearwell Ear Tags

We are experts in livestock identification and provide a whole range of official and management ear tags for cattle, sheep, goats and pigs. Whether you are looking for visual, EID, or tissue sampling tags for BVD and DNA, Shearwell Data has them all.

## Britain's favourite sheep tag

## Why choose Shearwell?

Our tag retention is industry-leading, but to give you peace of mind we offer free replacement tags for the life of the animal.

Our scheme started in 1999 with visual flag cattle tags and we have since added our SET Tags and TST tags. Our offer remains with the animal, even after it is sold!

For free replacement T&Cs please see our website  
[shearwell.co.uk/free-replacement-tags](http://shearwell.co.uk/free-replacement-tags)

“Shearwell tags are second to none! You can see they have been designed by a farmer, as they do the job and don't give you any problems.”

“I wanted to thank you for the free replacement tag scheme which you run so well. It is a really helpful system and one that makes you easily the best choice when I buy my tags, every time.”
