

# FASTVIEW360

superfast video monitoring

UK based Fastview360 provides various solutions that can be adapted to suit your requirements and we are dedicated to improving safety in all sectors including agriculture, construction, plant, haulage and site.

Solutions includes a variety of camera types, live tracking solutions, telematic integration and remote access via FV-Link. All hardware is tried and tested to ensure durability, in the most harsh environments.

**99%**  
retrieval

Customer footage is remotely retrieved within as little as 10 minutes of an incident occurring.

**360°**  
vision

Visual & warning recognition around your vehicle for humans in close proximity to the vehicle

**100%**  
dedication

Our after-sales support, training and customer service is as important to us as it is to you.

# Rural crime, road safety and lone working

Could you improve your operators safety?

HSE figures show in 2022/23 that 27 people died in farming and agricultural related activities.

In 2023, NFU claim statistics show the cost of rural crime rose by 4.3% reaching an estimated total of

**£52.8 million**

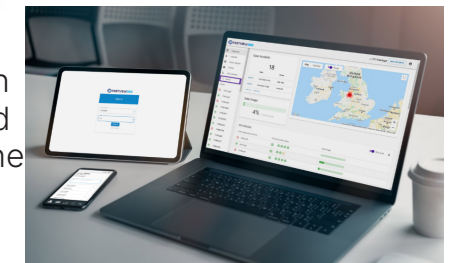

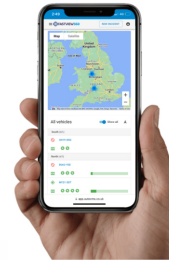

These figures include £13.9 million purely related to Agricultural Vehicle, ATV and GPS theft.

Fastview360 provides the operator visibility and warnings of bystanders in dangerous areas around the vehicle. It also provides remote live access to your vehicles for both camera viewing and tracking features.

The remote DVR wake up feature allows you to track and view assets if stolen or left inactive.

“Fastview360 has enabled me to support my drivers should an incident occur. We are first to be blamed but the video evidence has the true version of events capture - remotely”

James Dodd, Manager at Dodds and Sons Ltd

Fastview360's experience in the agricultural sector gives insights to the issues faced by operators. Modern vehicles often gain more blind spots as the size of the equipment grows.

Reduce and remove blind spots with our HD camera safety system.

Fastview360 can integrate with existing on board systems to reduce hardware in the cab and utilise triggers for alerts.

Using the latest camera recognition technology, bystanders can be detected and notified they are in a dangerous area whilst also alerting the operator of their presence.

Video analytic provide alerts both inside and outside the cab should any pedestrian enter a danger zone around the vehicle.

Fastview360's provides live viewing access through a dedicated app, FV-Link, where you can view your tractor and driver in real time as they are working.

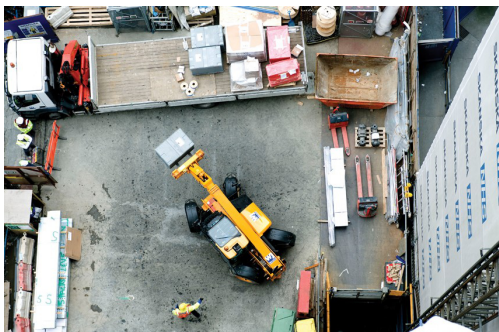

Access can be on your PC, laptop, tablet or phone - your fleet at your fingertips.

# “The latest technology software, on hardware made to last”

Damion Davis, Fastview360 Managing Director

- ✓ The latest technology - tried and tested
- ✓ Remote live camera and tracking access
- ✓ Incident/ insurance handling process
- ✓ Suitable for all vehicle types
- ✓ High quality customer service
- ✓ 100% safety standard compliant
