## Vision V i

**Upgrade your irrigation  
with the SIL Vision V i**

**Efficient Irrigation Reinvented  
Every Drop Under Control**

The Vision V i sets a new standard for diesel-powered irrigation systems, featuring automated controls, precise pressure and flow regulation with optional GSM-enabled remote operation. Engineered to monitor the health of both engine and pump with enhanced reliability, this system offers a robust solution for engine-driven irrigation.

### **Simplified Operation**

Enhanced safety: Operator Start-Up Checklist ensures safe and efficient system management.

### **Accurate Pressure and Flow Control**

Efficiency optimised: Better fuel economy and reduced water usage for sustainable operations.

### **Improved 'End of Run' Auto Stop Reliability**

Smart monitoring: Checks pump speed, pressure and flow for consistent and reliable shutdowns.

**Fast, Reliable High Flow Trip for Burst Pipe Protection** Leak detection: Engine speed and flow profile monitoring provide a rapid response to potential burst pipes.

### **Gentle on Pipes**

Soft throttle technology: Fully automated pressure and flow regulation prevents pipe stress and damage.

### **Simple Integration of Electric Priming**

Versatile priming options: Includes both manual and automatic priming control as standard.

### **Easy Upgrade Options**

Remote control ready: Add remote start, stop and status reporting via GSM text messaging.

### **Electronic Engine Ready**

Compatible with most electronic engines: SIL have a wealth of experience in migrating from mechanical to electronic and Stage V engines.

Get in touch with your dealer today to learn how the **Vision V i** can revolutionise your irrigation system.
