

We have changed; reducing costs and enhancing flexibility.
Fair & Transparent Storage

Over the past 18 months, Camgrain has undergone significant change. Through strategic cost control in procurement and adjustments in headcount, we've added over £1 million to our 'cash' P&L—enabling us to invest in infrastructure without increasing our debt. Our debt levels are falling, and interest costs are down 20% year on year.

The savings are passed directly back to you. For 2026, intake handling charges are just £9.90 per tonne, plus haulage to your nearest Camgrain store. Ergot charges now start at £4 per tonne.

We offer flexible options to suit your needs, with two accessible entry routes and minimal upfront costs.

Discover more on our website or reach out to our membership team today.

477,000 Tonnes of storage capacity across our sites

Three state-of-the-art Grain Storage facilities across East Anglia and the East Midlands work as one seamless unit, ensuring efficient farmer collections and optimised customer deliveries. By directing crops to the closest end market, we cut transport costs, reduce food miles, and enhance sustainability. As a member, your grain would move to where it achieves the best results.

We provide unrivalled drying, conditioning, blending, and colour sorting, ensuring our members' crops consistently meet the highest market standards for premium buyers. Through partnerships with industry-leading marketing experts, Camgrain connects farmers directly to the food production supply chain, maximising value and market opportunities.
