POWER FROM
HERITAGE PASSION
FOR THE FUTURE

BEGINNING

FROM WORKSHOP TO INDUSTRIAL POWER

It all began in 1960 in a humble 9 m² workshop beneath the family home in Simav, Kütahya. From those modest beginnings, our company has grown into a thriving industrial enterprise, a remarkable story of dedication, progress, and success.

TODAY

HISTORY

WWW.KZCTR.COM

Strengthening its corporate identity under the brand Kazcioğlu Industrial Solutions, our company combines deep-rooted experience, engineering excellence, and a wide product range to successfully serve both domestic and international markets.

Today, operating across three locations with a total of 24,000 m² of enclosed production space and 340 qualified employees, Kazcioğlu Industrial Solutions provides end-to-end solutions for the core industrial needs of multiple sectors through a production approach built on high-quality standards.

OUR VALUES

At Kazcioğlu Industrial Solutions, we demonstrate a strong corporate stance not only through the parts we produce, but also through the way we conduct business, our respect for our people, and our responsibility to society. The values that define who we are form the foundation of our growth.

01

RELIABILITY

Trust forms the foundation of our relationships. We fulfill every promise — with quality, on time, and without compromise.

02

QUALITY AND CONTINUITY

We apply technical excellence and smart solutions at every stage of production. Beyond the product itself, we stand among the industry's best through our unwavering commitment to process quality.

03

SUSTAINABILITY

We place sustainability at the core of both our production processes and our approach to social responsibility—creating lasting value while addressing environmental and social impacts.

04

CONTRIBUTION TO EDUCATION AND SOCIAL RESPONSIBILITY

With a vision of investing in the future, we develop industry-integrated vocational training programs, support women's employment, and take pioneering steps to create social value.

OUR VISION

To be a globally recognized industrial solutions partner, distinguished by high-technology production and driving transformation across industries.

Guided by innovation, driven by talented people, and committed to sustainable growth, we contribute to the industry's future—starting today.

Our goal is to lead the sector with products that make a difference in global competition and leave a lasting mark on tomorrow's industrial world.

WE TRANSFORM AN IDEA INTO A
PART, A PART INTO SUCCESS AND
WITH THAT SUCCESS, WE GO
BEYOND LIMITS.

OUR MISSION

At Kazcioğlu Industrial Solutions, our mission is to deliver engineering-driven, high-quality, and sustainable solutions to strategic industries—including automotive, defense, agriculture, construction machinery, and rail systems.

We enhance our customers' competitiveness through flexibility, speed, and technical excellence across every stage of production, while placing social benefit at the heart of our operations.

Through industry-integrated training programs and inclusive employment models designed for youth and women, we produce not only precision parts—but also the future.

Every product we deliver represents a commitment to long-term partnerships, technological advancement, and social development, empowering us to play a multifaceted role in shaping the future of industry.

With an engineering-driven production approach, Kazcioğlu Industrial Solutions delivers tailored solutions for the core industrial needs of critical sectors—including automotive, defense, agriculture, construction machinery, and rail systems.

Through our specialized production departments, we offer a wide range of products—from steering and suspension components to pipe and hose assemblies, and from precision machining to cold forging.

Thanks to our flexible production capabilities and high-quality standards, we are a trusted supplier for both mass production and customized solutions—serving partners across national and international markets.

FIELDS OF ACTIVITY

AUTOMOTIVE

DEFENSE

Kazcioğlu Industrial Solutions is a trusted solutions partner in the production of high-strength, precision-tolerance components for the defense industry. With advanced engineering infrastructure, we ensure accuracy and quality at every stage of production.

We manufacture steering, suspension, and linkage components with the high precision critical to road safety and vehicle performance.

With our solutions integrated into OEM production lines, we stand at the heart of motion.

CONSTRUCTION
MACHINERY

We ensure the safe and reliable operation of heavy machinery with high-performance components built to withstand the toughest working conditions.

With a production philosophy that unites power, durability, and precision, we stand ready wherever the job takes us.

FIELDS OF ACTIVITY

We manufacture precisely machined, durable, and long-lasting components for trains and rail systems—where safety is non-negotiable.

Through the power of engineering, we sustain the continuity of motion.

2025 | 9

RAIL SYSTEMS

We produce durable, long-lasting components for agricultural machinery—earning our place as a trusted solutions partner for manufacturers.

With engineering solutions designed for the most demanding field conditions, we deliver measurable improvements in performance and reliability.

TARIM

OUR PRODUCTION INFRASTRUCTURE

Kazcioğlu Industrial Solutions carries out end-to-end production across three integrated facilities spanning a total area of 24,000 m².

Our operations include dedicated departments for precision machining, pipe bending, assembly, welding, coating, quality control, mold production, steering system components, and R&D.

Each unit is equipped with state-of-the-art machinery and optimized to deliver both the flexibility of mass production and customized, customer-specific solutions.

VARIOUS AUXILIARY
MACHINES

Our pipe assembly line can bend a wide range of materials—including steel, aluminum, copper, brass, stainless steel, and Bundy tubes—with diameters from 4 mm to 80 mm.

Pipe ends within this range (Ø4 mm to Ø80 mm) can undergo countersinking, doming, necking (diameter reduction), and expanding operations.

Dimensional measurements, surface roughness tests, and internal cleanliness analyses are performed using state-of-the-art laboratory equipment in accordance with relevant industry standards.

MACHINING DEPARTMENT

CNC MACHINING
CENTERS

45

VARIOUS AUXILIARY
MACHINES

Our Machining Department is equipped with CNC lathes, CNC machining centers, conventional lathes, and milling machines.

With a machining envelope of 1,300 × 600 mm and a turning capacity of up to Ø240 mm, the department processes steel, stainless steel, aluminum, brass, copper, and special alloys with high precision and tight tolerances.

COLD FORGING DEPARTMENT

27

PRESS

24.000.000

UNITS / YEAR

Kazcioğlu Industrial Solutions operates one of the highest-capacity cold forging facilities in Türkiye.

Equipped with 27 presses, the department serves leading global brands with an annual production capacity of 24 million parts.

Forging components in the 50–1,000 gram range—including critical parts such as ball joints, Z-links, and tie rod housings—with high precision, the facility ensures consistent quality and performance.

In addition to steel, the department also successfully produces cold-forged aluminum components.

COMPLETE TIE ROD PRODUCTION

Kazcioğlu Industrial Solutions manufactures tie rod ends, axial joints, and tie rod assemblies for the steering systems of tractors and construction machinery—in full compliance with the highest engineering standards.

These critical components are developed under our FABBRO brand, with durability, safety, and performance as top priorities, and are exported to global markets.

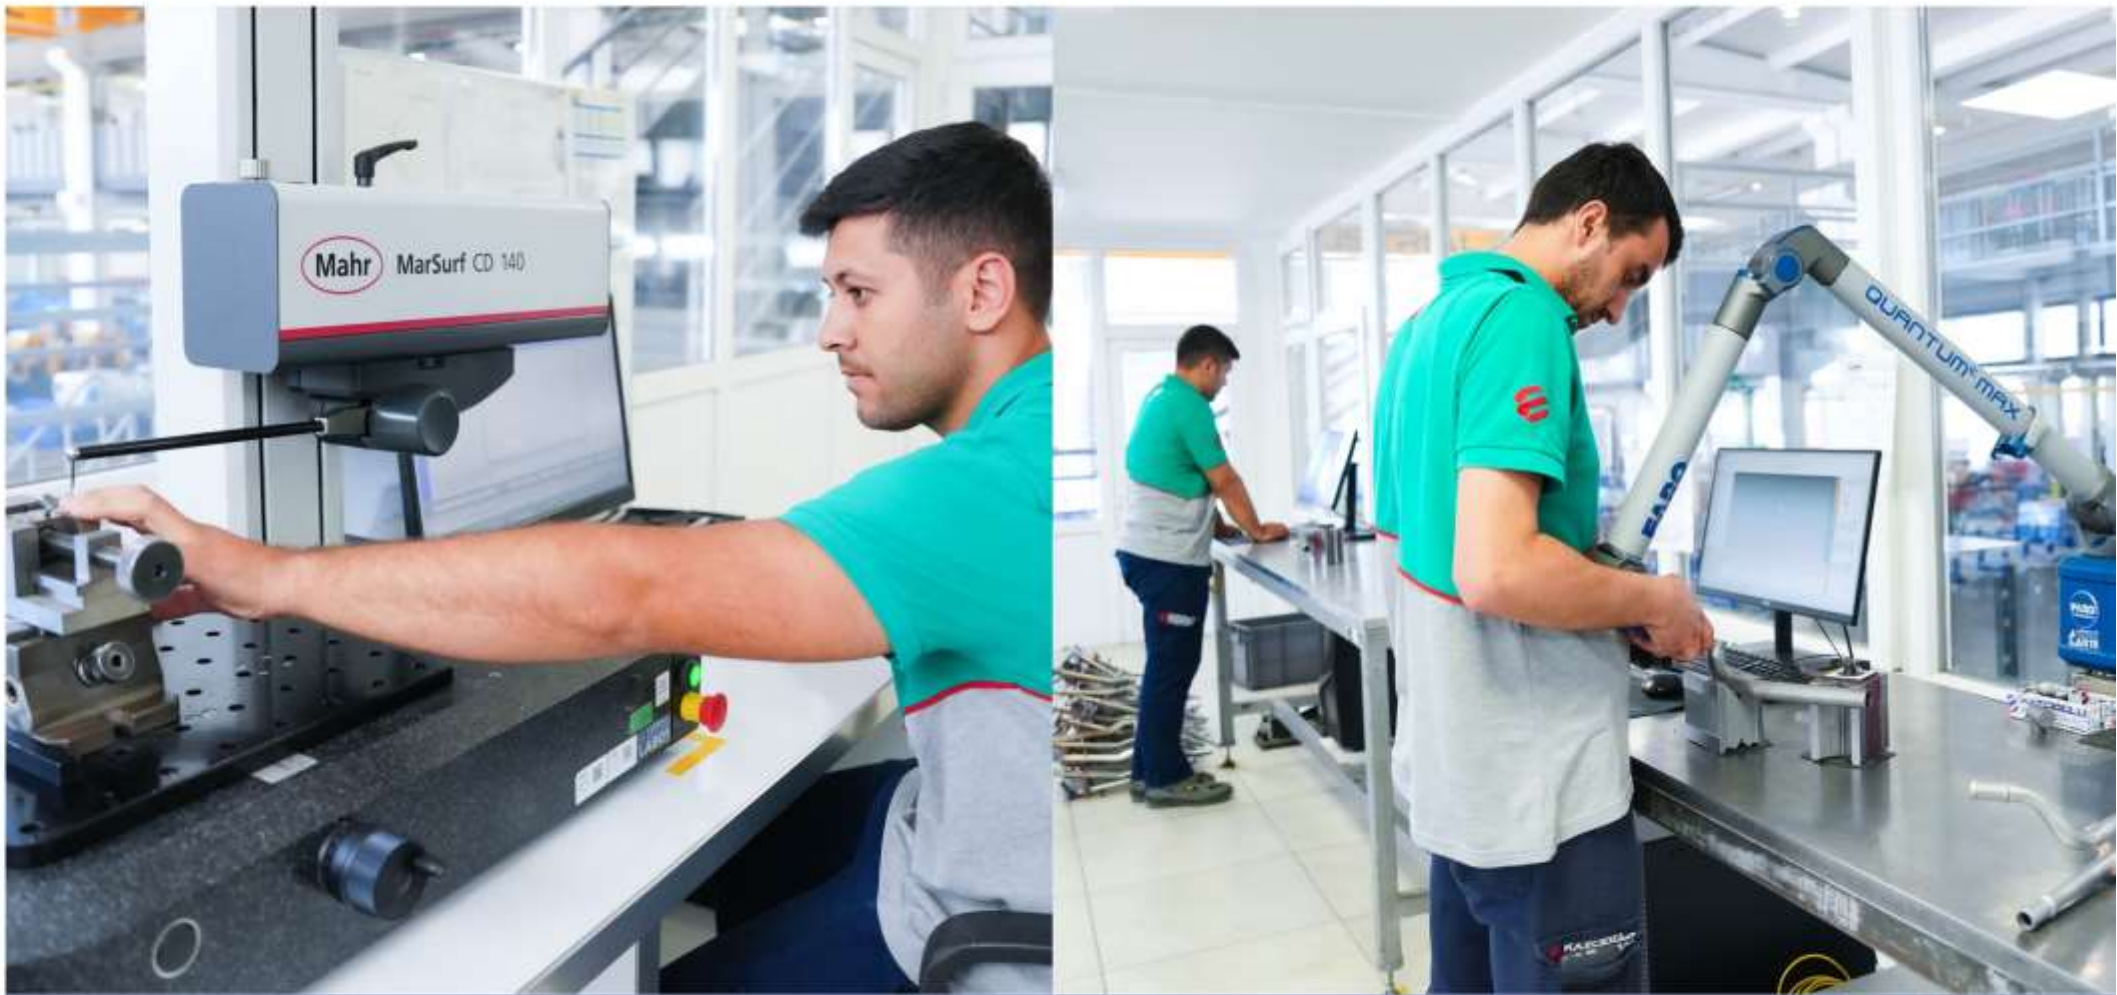

All processes on our modern production lines are supported by tight tolerance control, robust quality assurance systems, and comprehensive testing procedures.

QUALITY APPROACH

Kazcioğlu Industrial Solutions views quality not merely as an outcome, but as an integral part of every production process. Guided by this philosophy, our Laboratory and Quality Control Department meticulously performs measurement, inspection, and analysis at every stage of manufacturing.

- ISO 9001
- IATF 16949
- ISO 45001
- ISO 14001

The Kazcioğlu Industrial Solutions Quality Laboratory is equipped with the latest measurement and analysis technologies, including advanced systems such as contour profile scanners, a 3D laser FARO arm, a 2D digital height gauge, a digital hardness tester, a surface roughness tester, and a profile projection system.

The laboratory's capabilities are further enhanced by mounting and polishing equipment, as well as internal cleanliness analysis systems.

With more than 400 gauges and inspection instruments, every product is verified within precise tolerances and in full compliance with international standards.
