

3S[®] PRO

**3S[®] Pro wheels last longer, fit multiple tractors,
and make trackwidth changes safer and easier.**

3S[®] PRO

- 1** Safely interchangeable between the most common trackwidths, without the high risk associated with manual handling of adjustable centres.
- 2** Interchangeable between tractors. Simply change the 3S[®] Adaptor to suit differing models.
- 3** Higher residual value thanks to versatility across different models and track widths
- 4** Centre wheel studs never need to be undone, meaning less risk of wheel nuts coming loose.
- 5** Compatible with central inflation systems.

3S[®] PRO

3S[®] PRO

Change Track Widths Without the Hassle

Instead of handling heavy components, 3S[®] Pro allows you to achieve the most between 72" and 2m track widths with a simple side-to-side wheel swap. No lifting, no complex adjustments.

3S[®] PRO

One Wheel System. Multiple Machines.

The 3S[®] Pro system is designed to work across your fleet. By simply changing the 3S[®] adaptor, the same wheel set can be used on different tractor models.

3S[®] PRO

Safer by Design. Reliable by Nature.

The system keeps centre wheel studs untouched during adjustments, protecting critical fixings and ensuring consistent reliability.

3S[®] PRO

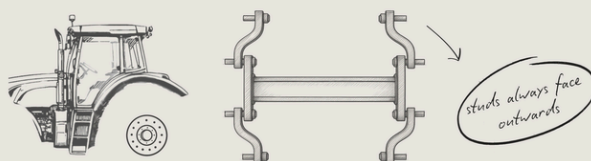

Optimise performance in every condition

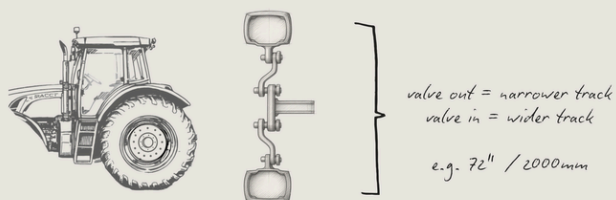

3S[®] Pro is fully compatible with central tyre inflation systems, giving you the ability to adjust pressures on the move and get the best from your tyres at all times.
