LED TECHNOLOGY

More light, lower power consumption and a significantly longer service life – LED headlights offer compelling advantages over conventional lighting.

To ensure that you are able to make the most of these benefits, there are a few important points to bear in mind when making your choice. This brochure provides a quick overview of the key factors to consider when choosing the right lighting.

WHY CHOOSE LED TECHNOLOGY FROM GRANIT?

IN A NUTSHELL:

1. High-performance LED technology for maximum visibility
2. Robust construction and easy conversion
3. Tested quality with a wide range of applications

1 HIGHER SAFETY THANKS TO HIGH LIGHT OUTPUT AND EMC-CERTIFIED TECHNOLOGY

GRANIT LED work lights ensure optimum visibility and higher safety during everyday working life as a result.

- High light output with low power consumption
- Light colour similar to daylight for focused work at night
- Compliance with the ECE R10 regulation (protection against radio interference)

The high energy efficiency reduces the load on the vehicle's electrical system, whilst its certified electromagnetic compatibility ensures that there is no interference with radio communications, control units or other electronic systems.

Result: Better visibility. More control. Higher safety.

See the difference now
Scan the QR code and experience the
before and after comparison.

2 ROBUST, DURABLE AND EASY TO RETROFIT

LED technology from GRANIT impresses with its:

- Long service life
- Low power consumption
- High IP protection classes
(e.g. dust-tight and water-resistant, even when subjected to pressure washing)
- Resistance to demanding operating conditions

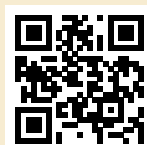

Replacing standard headlights with LED versions is extremely straightforward. Thanks to their modern design, the headlights can be installed quickly and are ready for immediate use.

Advantages: Less maintenance, fewer breakdowns, easy conversion.

Installation in just a few minutes?

Scan the QR code and watch the **short installation** video.

3 GRANIT LED WORK LIGHTS IMPRESS WITH THEIR RELIABLE QUALITY AND VERSATILE RANGE OF APPLICATIONS:

- Suitable for a wide range of machines, vehicles and applications
- Consistent performance even in extreme conditions

Thanks to the rapid availability via the GRANIT sales network, you can rely on tested, high-quality LED lighting in no time – for any application, ready whenever you need it.

This means: Tested quality – without long waiting times.

How can LEDs be used flexibly?

See for yourself, scan the QR code here

IP CLASSES AND RADIO INTERFERENCE SUPPRESSION FOR LED WORK LIGHTS

IP classes in accordance with DIN EN 60529

IP = Ingress Protection

Classification for protection against the ingress of particles and water.

Structure of the IP class:

- **IP + first digit:** Protection of persons against contact with live parts and protection against solid foreign objects.
- **IP + second digit:** Protection against the harmful ingress of water.

First digit	Protection against solid foreign objects	Second digit	Protection against water
0	Not protected	0	Not protected
1	> 50 mm	1	Drops falling vertically
2	> 12 mm	2	Dripping water under 15°
3	> 2.5 mm	3	Drops falling at an angle of up to 60°
4	> 1 mm	4	Spray from all directions
5	Dustproof	5	Water jets from any angle
6	Dust-tight	6	Strong water jets from any angle
		7	Temporary immersion (30 min.)
		8	Permanent submersion
		9 K	Powerful steam cleaning from any direction

RADIO INTERFERENCE SUPPRESSION IN LED WORK LIGHTS FOR AGRICULTURAL AND CONSTRUCTION MACHINERY

Electromagnetic compatibility (EMC)

- The ability of a device to operate without interference in an electromagnetic environment.
- Particularly relevant in vehicles with a large number of electrical devices.
- The ECE R10 regulation sets out limits for emissions and resistance to interference.

Measures at GRANIT:

- Filtering and shielding: minimises interference signals.
- Optimised circuit design: reduces the occurrence of interference.

CISPR 25 classes:

Class	Description
1	Highest tolerance to interference, maximum permissible interference levels
2	Moderate environments, stricter limits than class 1
3	Typical vehicle environments, moderate limits
4	Low tolerance to interference, stricter limits
5	Environments that are particularly susceptible to interference, the strictest limits

- The choice of CISPR class depends on the operating environment.
- All Granit LED work lights meet the minimum requirements of ECE R10.
- Further tests in accordance with international standards are listed in the webshop or on the packaging.

LED LIGHT BARS

12 / 24
Bulbs included
Light function: close-range/far-reaching illumination
Mounting type: stainless steel bracket

Housing: aluminium, lens: plastic
Protection class: IP6K9K
Connection: DEUTSCH plug DT 2P

REAR LIGHTS

GRANIT

MAGNETIC LED LIGHT SET IN CASE

Left/right including 12 m connection cable and case

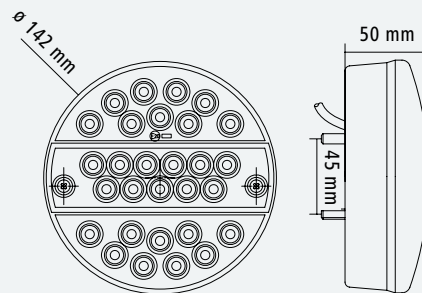

Part no.: 7070010193

- With 4-function LED lights, 12 V (tail/brake/indicator/number plate light and triangular reflector)
- Intermediate cable: 2.5 m
- 12 m connection cable with 7-pin plug
- With practical protective case for storing or transporting the lights

GRANIT LED REAR LIGHT

GRANIT LED TRAILER LIGHT

Part no.: 12292115

GRANIT WIRELESS MAGNETIC LED LIGHT SET

Not permissible in accordance with the German Road Traffic Licensing Regulation (StVZO)

Part no.: 11044568

No CANBUS function
Battery-powered
Charging time: 2 hours
Running time: 10 hours
Not permitted in accordance with the German Road Traffic Licensing Regulation (StVZO)
A 220 V plug is NOT included

GRANIT WIRELESS MAGNETIC LIGHT SET

Dynamic indicator, not permissible in accordance with the German Road Traffic Licensing Regulation (StVZO)

Part no.: 19351190

Frequency: 2.4 GHz
Battery type: 7.4 V @ 2200 mA
Charging time: approx. 2-3 hours, with 5 V @ 1 A
Control distance: max. 20 m
Running time: 10 hours

GRANIT LED RESISTOR

Part no.: 70799127

LED resistor for increasing the line resistance when using LED bulbs.
Prevents false alarms from the light failure monitoring system and allows full LED bulbs to be used.

INSTALLATION MATERIALS

GRANIT DEUTSCH DT ASSORTMENT

236 pcs.

Part no.: 50754290600

GRANIT CONNECTOR ASSORTMENT

580 pcs.

Part no.: 50754290150

AMP Superseal

GRANIT 175-PIECE CRIMPING SET + CRIMPING TOOL

Part no.: 5070010119

GRANIT PROFESSIONAL CRIMPING SET

400-piece set + crimping tool

Part no.: 5070010120

GRANIT

LED DISPLAY STAND

This item is supplied without lights/bulbs

Part no.: 19417276

Part no.: 36635749

Space for 12 work lights and 2 rotating beacons
(must be ordered separately)

Easy connection via terminals

230 V connection with converter to 12 V

Each light can be switched on individually,
automatic shut-off after 5 seconds

GRANIT

CABLE WITH 2X 2-PIN DT PLUG

Part no.: 5070011153

GRANIT

ADAPTOR CABLE DEUTSCH DT TO 9005

Part no.: 12293919

GRANIT

ADAPTOR CABLE DEUTSCH DT TO H9/H11

Part no.: 12293920

GRANIT

ADAPTOR CABLE DEUTSCH DT TO MF

Part no.: 12221141
