

PROBOSS

COMFORT MAKES A DIFFERENCE

PROBOSS – Where comfort becomes performance

A seat isn't just a seat, but a place where concentration and endurance are required if the user is to work effectively. Anyone who spends hours in a machine knows that it's only possible to work well when sitting comfortably. PROBOSS uses this knowledge as a guiding principle in its mission to develop seats that are both comfortable and groundbreaking.

Design with high standards

PROBOSS seats are more than just technical components. They are a statement of ergonomics, style and function. The clearly shaped seat and backrest support the body exactly where it needs to be supported, and the integrated lumbar support provides lasting relief. An innovative upholstery design with climate control channels regulates the temperature (supported by integrated seat heating and cooling for every season). In addition, rotation and tilt functions allow maximum freedom of movement and adapt flexibly to working conditions in the field or on the construction site.

Technology that inspires

High-quality materials made in Germany and components from leading manufacturers guarantee the highest level of quality and durability. The enlarged rollers in the suspension system ensure exceptional smoothness that is noticeable with every metre. The intuitive operating concept impresses with ergonomically designed switches, levers and controls that are both functional and appealing in terms of feel and appearance. A new addition is the innovative APS function, which enables automatic adjustment and positioning of the seat for even greater comfort and precision.

Diversity that fits

Whether equipment is needed for a compact tractor cab or a spacious workplace within a large tractor, PROBOSS offers an impressive variety of models from standard seats to the new model with a width of 550 mm. Passenger seats with rotation function and comfort seat cushions complete the range, and will make every cab a place where anyone will be happy to sit.

Premium and future-oriented

With PROBOSS, you aren't choosing just any seat, but a seat that will fit your machine perfectly. PROBOSS products are tailor-made, pre-fabricated, ready for immediate use and available exclusively from specialist dealers.

This is a service that makes all the difference and will take your workplace to a new level.

Read on and discover why sitting will never be the same again.

PROBOSS - AGRICULTURAL SEAT

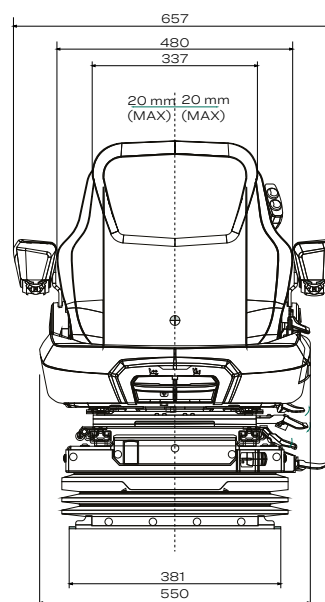

AS7550

AS7550 | AIR SUSPENSION

NEW

Part no. 35926359

- Broad suspension assembly 381 mm
- APS (Automatic Positioning System)
- Low-frequency suspension with additional reservoir
- Progressive damping
- Universal base plate
- 3-stage Multi Stage heater
- 550 mm seat cushion width
- 3-stage climate control and cooling function
- Pneumatic lumbar support
- Fore/aft isolator
- Side horizontal suspension
- 20° rotation to left and right, user can choose between free rotation and rotation with detent
- Seat belt with automatic retraction
- Seat cushion tilt adjustment
- Seat cushion depth adjustment
- Document box
- 12V air suspension
- Seat contact switch
