

WELCOME TO **EAST RIDING SACKS LIMITED**

THE LEADING UK PAPER SACK COMPANY

East Riding Sacks are the largest manufacturer of paper sacks in the UK and we are the market leader for all industry sectors supplied. With a purpose-built factory and warehousing across a spacious 20 acre site, we are continuously investing in people, infrastructure and custom-built equipment.

All our paper sacks are manufactured under stringent quality and hygiene standards and are suitable for use in the human and animal feed supply chain. We have three modern printing lines which can print up to eight colours, as well as high-speed conversion lines which also incorporate automatic palletisation.

Last but not least, we have a fleet of transport, where you can have peace of mind knowing that your bespoke sacks will be well looked after every step of the way - from our manufacturing facility to yours.

ABOUT US

MAIN SECTORS

Annual Volumes

Agriculture - Potatoes,
Animal Feed

Flour & Food Ingredients

Industrial - Cement, Building
Products, Chemicals

SUPPLY CHAIN / RAW MATERIALS

At East Riding Sacks we have established long term relationships with key raw material suppliers which allows full traceability from raw materials to finished goods.

All our materials are carefully picked out by dedicated planning and purchasing teams, with each supplier being selected based on quality and reliability and with the guarantee of the use of high quality virgin fibre sack kraft. All our purchased raw materials are suitable for direct food contact.

SUSTAINABLE SOURCING

All the paper used at East Riding Sacks is responsibly sourced from well managed and sustainable forests. We take extreme care to ensure the following:

No illegal logging or trade in illegal wood / forest products exists in our supply chain.

The destruction of high conservation values in forestry operations is avoided.

All import / export customs laws for woodland products are adhered to.

Forests are not converted to plantations or non-forest operations.

SUSTAINABLE CONVERSIONS

Renewable Energy

We have installed 1,300 solar panels, which are projected to reduce approx. 20% of our annual purchased energy.

EV Charging

We have installed dedicated electric vehicle charging points.

Internal Recycling

We recycle all paper waste and wastewater from our production areas.

Energy Efficient

We have upgraded all our lighting to energy-efficient LED fixtures throughout.

As part of our ongoing commitment to reduce our environmental impact, we have implemented a series of sustainable conversions across our operations.

Our recent milestone has been the installation of **1,300 solar panels** on site, which is projected to reduce our annual purchased energy consumption by **approximately 20%**.

In addition, we have completed a full transition to **energy-efficient LED lighting** throughout our facilities, further lowering our electricity usage.

To support the shift towards greener transport, we have also installed **electric vehicle charging points** for both employees and visitors. These initiatives reflect our broader strategy to embed sustainability into the core of our infrastructure and day-to-day practices.

DESIGN & PRINT STUDIO

We have a dedicated team of design & print specialists that are available to guide and advise you on your branding journey. Having a design & reprographic studio on site, allows full control of your custom artwork from initial concept, design, amendments & approvals.

Our print department has access to an Ink Blending System which is capable of producing bespoke colours and flexographic print which can print full colour - up to 8 colours. There is a total of 3 x flexographic CI printing presses which includes a full colour management system and barcode verification.

01

DESIGN

Discuss your requirements with our dedicated Design Studio. Allowing you to have full control over your bespoke artwork which can include up to 8 colours.

02

PRINT

Once approved, your bespoke design will be printed with one of our three full colour flexographic CI printing presses with a printing speed of up to 500 metres per minute.

03

DELIVER

Using our automatic production lines & palletisation system, your paper sacks will be printed, converted, packed & loaded onto the fleet of vehicles at East Riding Sacks.

ALLSTEIN HYDRO PRESS

The addition of our brand new eight-colour Allstein HYDRO press opens the door to new possibilities in terms of productivity and flexibility.

The new press achieves maximum productivity due to short set-up times and high printing speeds of up to 500m/min. No matter how demanding the challenges of the particular print job are.

A solid design with 140mm steel side frames, the use of hydrostatic bearings as well as the proven ALLSTEIN block-on-block solution guarantee the best print quality in the market.

”

Our SOS Bags are a versatile and sustainable packaging solution, widely used in retail settings including the food and healthcare industries. Ideal for products such as flour, rice and pet foods, these bags are designed with strength, reliability and safety in mind.

NEW SOS BAGS

Why Choose Our SOS Bags?

- **Premium Quality** - Crafted to meet the highest standards, ensuring durability throughout the supply chain.
- **Food Safe & Hygienic** - Manufactured to the highest standards, keeping your products fresh and protected.
- **Sustainable Paper Packaging** - An eco-friendly alternative that helps reduce your carbon footprint without compromising performance.
- **Trusted UK Manufacturing** - As the UK's largest paper sack manufacturer, we guarantee consistency and quality in every order.
- **Fast & Reliable Delivery** - With our own dedicated fleet of transport, we ensure your packaging arrives on time, every time.

OUR PRODUCTS

OPEN MOUTH BLOCK BOTTOM

Our open mouth block bottom sacks are widely used within the food & dairy industry and are available with a tubed in poly liner to protect your high value products.

We offer standard stitched sealing or 'safe seal' options, plus all our sacks are palletised for quick and safe filling by the end user.

ROLLED BOTTOM

Our rolled bottom sacks are available in a range of sizes and are commonly used throughout the food, flour and animal feed market.

Available with barrier plies which will protect your product once packed. We offer both gusseted and non-gusseted options which makes these sacks a popular choice amongst our customers.

SEWN OPEN MOUTH

Our sewn open mouth sacks are a firm favourite within the agricultural sector. Available in gusseted or non-gusseted form and can easily incorporate handles and mesh to promote your high-quality product.

Various coloured crepe can also be added to help you differentiate between your products.

VALVE

Our valve sacks are mostly used within the cement & chemical industry and are available with moisture barriers to protect your product.

We offer a range of valve options which will fit your filling equipment as well as offering a print and design service which will make your product stand out from the rest.

WATER SOLUBLE

Water Soluble paper sacks are typically used within the Industrial sector and offer an alternative to the standard valve sack.

The dissolvable paper allows for less wastage by being fully soluble in water, this eliminates handling time while also allowing a cleaner more safer work environment.

GREASEPROOF

Our greaseproof paper sacks provide a sustainable alternative to traditional plastic packaging while offering enhanced protection for products with a greasy content.

Ideal for the food and animal feed sectors where reliable protection from grease is essential.
