TEEMORE ENGINEERING
LIVESTOCK HOUSING SPECIALISTS

Teemore Engineering has been at the heart of innovation within the agricultural engineering sector for over 50 years. During this time the products sourced, designed and produced have evolved to meet the requirements of modern dairy and beef farmers.

All manufactured goods are produced at Teemore's head office site based outside the village of Derrylin in Fermanagh where large stocks of finished products are stored ready for distribution. In more recent years a new storage depot was opened at Whitchurch in Shropshire in the heart of England where again goods are stock piled ready for distribution.

Teemore are a market leader in the design and production of cow cubicles. Our focus has revolved around the comfort of the cow and engineered to stand the test of time.

BARRIER

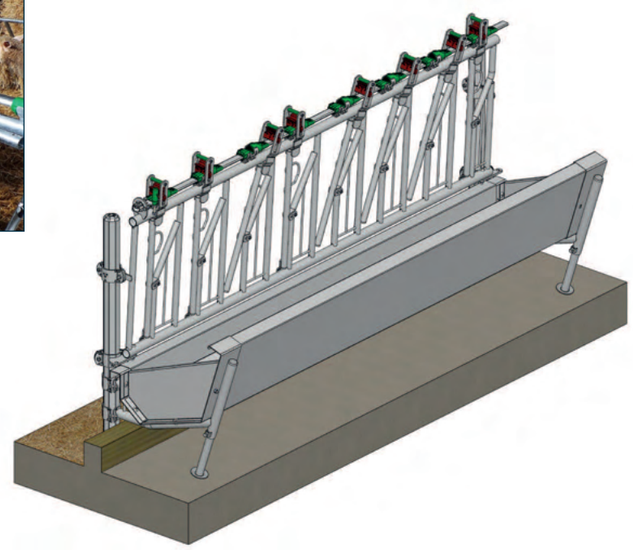

Goat Headlocks

A quality headlock suitable for use with goats. Up to 6 units can be connected and controlled by a single handle. Optional feed trough available.

FEEDERS

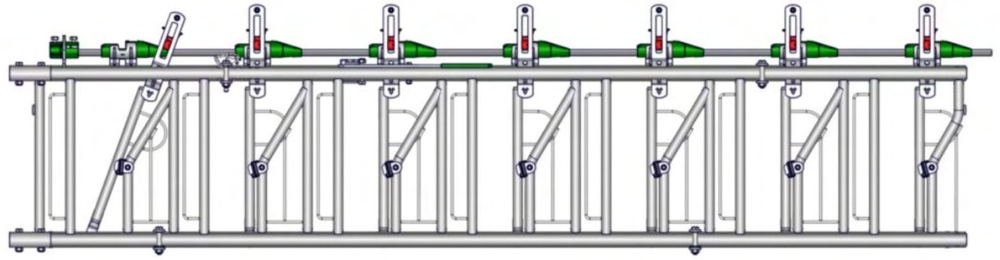

Metal Trough with Anti-Throw Out

A continuous trough system made from 2.5m length trough sheets. Comes in modular form, ensuring length customisation. Trough end piece is supplied separate. Brackets are available to hold trough in place.

BARRIER

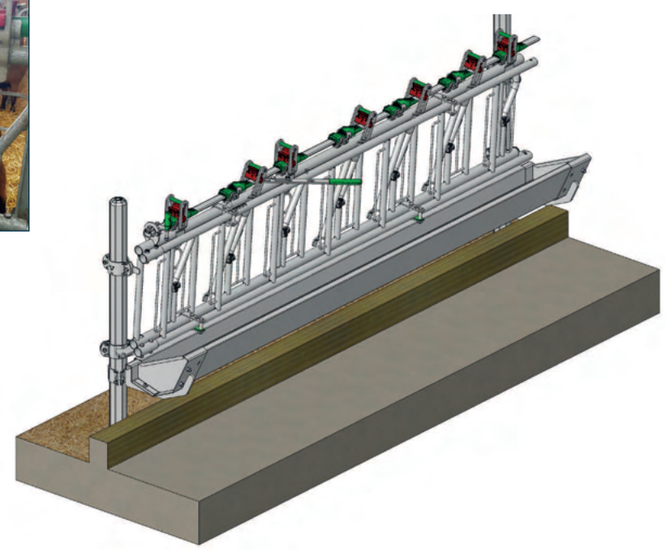

Sheep Headlocks

A quality headlock suitable for use with sheep. Up to 6 units can be connected and controlled by a single handle. Optional feed trough available.

FEEDERS

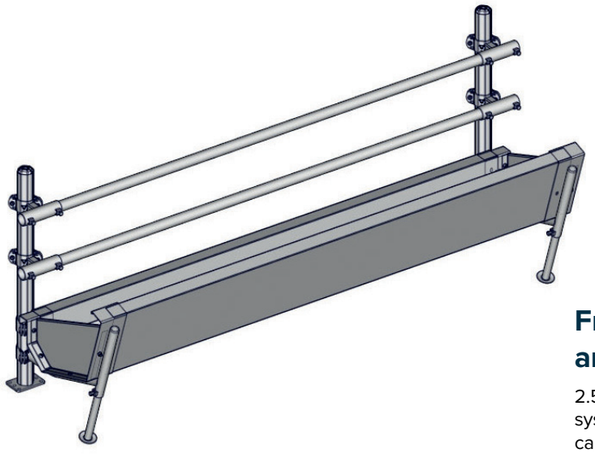

Metal Pellet Trough

A continuous trough system made from 2.5m length trough sheets. Comes in modular form, ensuring length customisation. Trough end piece is supplied separate. 76mm brackets are available to hold trough in place.

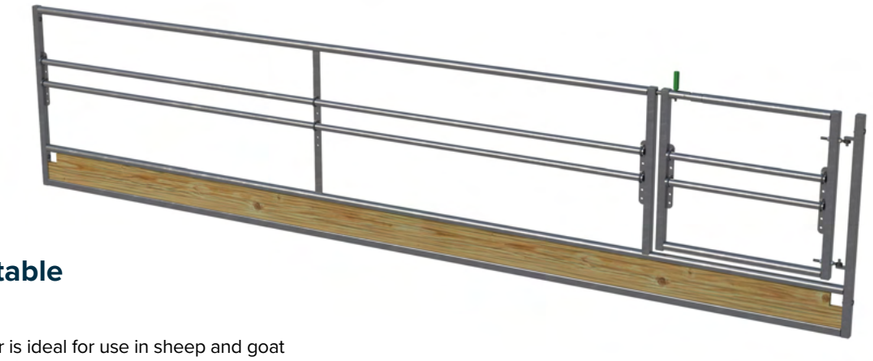

FEEDERS & FEED RAILS

Free Service Feed Rail and Trough

2.5mtr trough with adjustable neck rails is a continuous system, supplier in modular sections. Trough is large capacity with anti-throw out design.

BARRIER

Sheep Adjustable Feed Barrier

The adjustable barrier is ideal for use in sheep and goat buildings. Made from 42mm tube and standing at 1m high, the barrier is designed in mind of smaller animals.

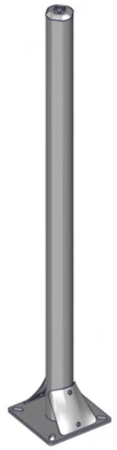

BARRIER

2 Bar Feed Rail

Each barrier has 1 metre of adjustment ensuring any opening can be catered for. The barrier is made from 60mm steel, with a 49mm adjustable end. There is a gap of 300mm between the bottom and top bar.

Posts & Brackets

TR2590
76MM Bolt Down Post

TR2580
Plain Post

TR4176
76mm Post Socket

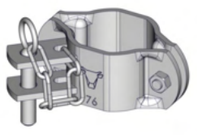

TR1611
76mm Post Socket Lid

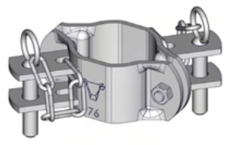

FE2102
Calf Flat Hanger (pair)

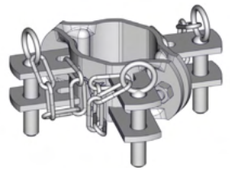

VE2505
Headlock Clawed CLamp42,27

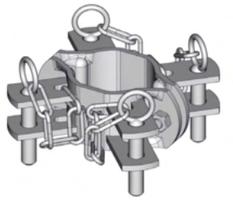

TR2595
1 Direction Hanger

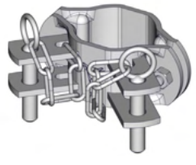

TR2596
2 Direction Hanger

TR2597
3 Direction Hanger

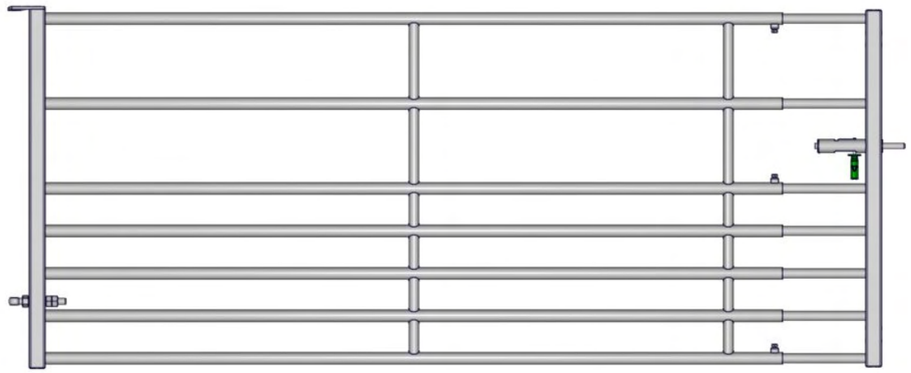

TR2598
4 Direction Hanger

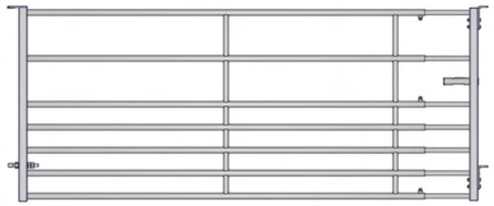

TR2599
2 Direction, Corner Hanger

BARRIER

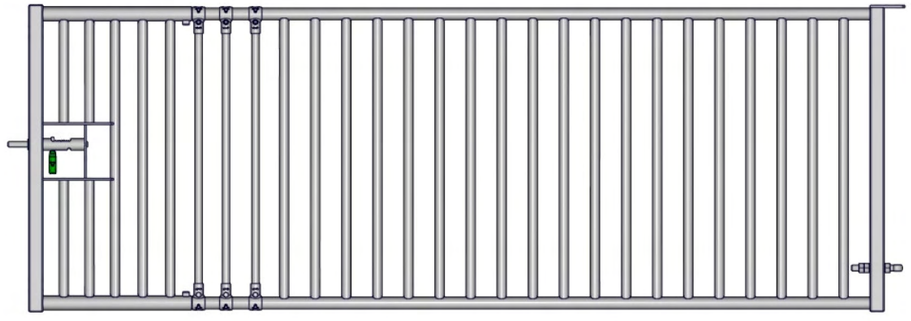

7 Bar Gate / Panel

These 7 bar gates have been designed specifically for use in fields or for small animal housing designs. The lower five bars have a 95mm spacing, this prevents smaller animals from sticking their head through the bars, which can be a potential choking hazard.

BARRIER

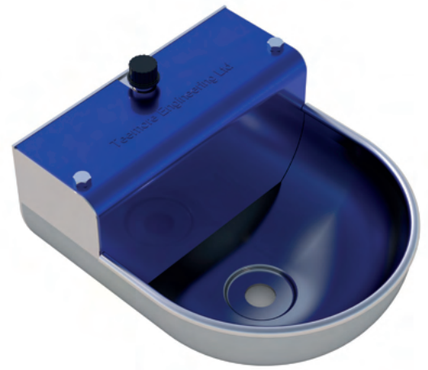

Separation Panel

This Jourdain vertical bar separation panel is designed to divide group sheep/goat pens. The vertical bars eliminate the possibility of the animals getting trapped.

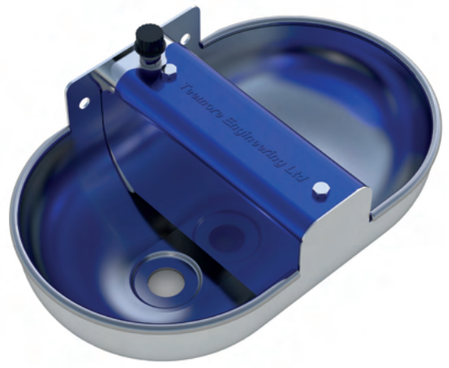

DRINKERS

Teemore Stainless Steel Single Bowl

The Teemore Stainless single bowl is ideal to place between two pens of beef stock, due to its stainless-steel design, paired if its ease of access for the animal to drink.

DRINKERS

Teemore Stainless Steel Double Bowl

The Teemore Stainless Double bowl is ideal to place between two pens of beef stock, due to its stainless-steel design, paired if its ease of access for the animal to drink.

DRINKERS

La Buvette Single Bowl

Single cast iron bowl with easy access ball valve.

DRINKERS

La Buvette Double Bowl

Double cast iron bowl complete with stainless steel valve cover. Ideally suited to mount between two pens.

DRINKERS

Nozzle Drinker

Single cast iron nozzle fill bowl that can be plumbed frc either top to bottom. The drinker is operated by the ani pressing its nose into the drinker, which opens the fill valve.

DRINKERS

Dumpy Drinker

JFC “Dumpy Tip-over Drinker’ is a 3.5 litre tipping drinker bowl that allows the farmer to empty the bowl by the press of a button.

Bespoke Sheep Facilities

Teemore Engineering specializes in crafting custom sheep facilities tailored to each customer’s unique requirements. Our team of experienced engineers and designers work closely with you to understand your specific needs and preferences. Whether you need a new sheep shed, handling system, or feeding setup, we can create a bespoke solution that maximizes efficiency and animal well-being.

We take into account factors such as flock size, layout, and environmental conditions to ensure the final product meets all your expectations. With Teemore Engineering, you can trust that your custom sheep facility will be designed and built with precision and quality, enhancing your farming operations.

FEEDERS

Circular Sheep Feeder

A fully galvanised, 24 space round feeder, this product is great for sheep and goats.

FEEDERS

Cradle Sheep Feeder

A feeder which is suited to feeding with round bales, lifted off the ground to slow down the rotting process and reduce wastage.

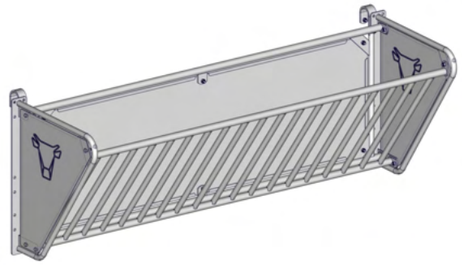

FEEDERS

Hay Rack and Trough Combined

The double-sided hay rack and trough combination is ideal for use in various situations, but especially in instances where large groups of calves are housed together.

FEEDERS

Modular Hay Rack

The modular hayrack by Jourdain is ideal for larger batches of calves. The vertical bars are ideal for allow calves easy access to the hay.

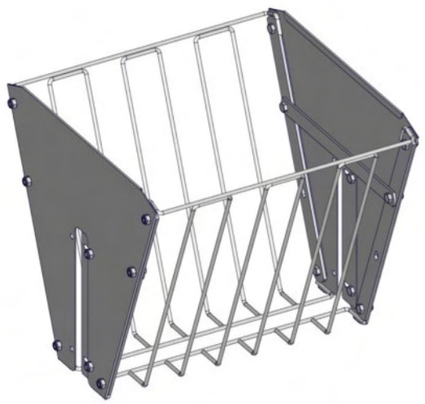

FEEDERS

Single Hay Rack

Single hay rack is useful for small batches of calves, and allows greater access due to the vertical bars.

FEEDERS

Pen Hay Rack

The pen hay rack serves as an excellent choice for lambing season when placed across a partition between two lambing pens, enabling convenient access from both pens.

FEEDERS

Sheep & Goats Trough

This trough can hang from any horizontal bar gates. The trough is fully galvanised with folded edges to protect stock from cuts and grazes. Comes in 2', 3', 6' and 7'6"
