About Dual Pumps

We are a leading provider of pumps, power equipment, and fluid handling solutions to a wide range of industries throughout the UK and export markets. Our expertise extends to manufacturing and selling pressure washers, pumping systems, and component assemblies. With a deep understanding of our products and a network of industry experts, we can cater to the specific needs of our customers.

We are recognised as offering exceptional service, characterised by speed, accuracy, and flexibility. Our customers can count on us for support and assistance, allowing them to focus on serving their clients.

We value open communication and respect in all our interactions and strive to be helpful, personable, and friendly. We take responsibility for our actions and always follow through on our commitments.

With over 48 years in the industry, a dedicated team, and our own warehouse, production, and testing facilities, we are well-equipped to meet the demands of our partners and stock a wide range of quality products.

The dependable choice for a broad range of industries, markets & applications

About Interpump

Interpump Group S.p.A. is the world's largest producer of professional high-pressure piston pumps and one of the global players in the market of hydraulic components.

The Interpump Group was born in 1977 in S.Ilario (near Reggio Emilia, in Italy), founded by Fulvio Montipò. Thanks to his technical improvements, including using innovative materials, the company was immediately able to produce high-pressure pumps that were smaller and easier to operate compared to competing products.

High-pressure pumps are used in high pressure cleaners, car wash systems, forced lubrication of tooling machines, water desalination with reverse osmosis and many other applications.

Ultra-high-pressure pumps and systems are used for cleaning surfaces, ships and pipes. But also for deburring, cutting and removal of concrete, asphalt and paint from stone, cement or metal surfaces and for cutting solid materials.

100% MADE IN ITALY

Pratissoli a brand of INTERPUMP Group

The Pratissoli line includes more than 120 pump models supplying flow rates up to 900 Lpm, pressures up to 1500 Bar and power up to 330 kW.
