THE NEXT GENERATION HAS ARRIVED

Tama is proud to introduce the next generation of baler twine with IMPAX™ Technology.

IMPAX™ Technology twine is formulated to provide unparalleled baling efficiency and built to withstand the shock load exerted on the twine during bale ejection.

This characteristic guarantees secure knots and unrivalled knot performance.

TOTAL WORKABILITY

IMPAX™ a revolutionary, patented technology achieving the impossible - strong, smaller diameter twine providing all the benefits:
Facilitates use within the knotting system of the baler, reduces in-season maintenance and minimizes downtime, thanks to far fewer mis-ties and broken bales.
All these lead to an increase in baling efficiency throughout the season, allowing the operator to concentrate on getting the job done. **THAT'S TOTAL WORKABILITY.**

KNOT PROTECTION
Peace of mind

SUPERIOR KNOTTING PERFORMANCE
Less downtime

UNMATCHED BALER OUTPUT
More bales

RECYCLABLE & SUSTAINABLE
Reduced carbon footprint

LESS WEAR & TEAR
Major savings

TESTIMONIALS FROM THE FIELD

PAUL PETERSSON
Manager
Tranbergs Jordbruks AB | Sweden

The twine worked superbly, with no broken bales."

MATHIEU LEROY
Press driver
SARL DUNEAU | France

Considerably reduces the time spent reloading the machine!"

YANNICK DUNEAU
Manager
SARL DUNEAU | France

The new twine made it possible to safely move up to 100% performance on our baler."
