FARM GROWN SOLUTIONS

# WE'VE GOT YOU COVERED

## CROP BALING CATALOGUE

# OUR STORY

Back in 1950, we first planted small seeds with big dreams. As the years went by, we nurtured them with love and care on our small farm... Now they have grown and yield cutting-edge, premium products, top quality service and an uncompromising supply chain that brings Farm Grown Solutions to each and every one of our customers around the world, so that we can continue to grow together.

**At Tama, we've got you covered – from protecting your crops to ensuring reliable and consistent baling – giving you one less thing to worry about.**

Leveraging over 70 years of agricultural and manufacturing expertise and experience, Tama is more than just a provider of high-quality crop baling products.

As farmers, we understand your concerns and offer Tama+ our range of world-leading, edge to edge netwrap and twine solutions. When the time comes to focus on baling, we accompany you throughout the process - from selecting the right product, through facilitating non-stop, trouble-free baling, to maximizing performance.

By choosing Tama, you enjoy not only leading products and solutions, but also peace of mind, enabling you to focus on what you do best - being a professional farmer.

ORIGINAL TAMA® EDGE TO EDGE NETWRAP

When it comes to Netwrap

# TamaNet+

## WE'VE GOT YOU COVERED

## With TamaNet+ you get the security that you need and the peace of mind you deserve.

Once the baling season begins, you need to be sure that your netwrap stays strong, right from the day you wrap the bale, until the day it is used.

Founded and managed by farmers, Tama understands your need for robust netwrap and offers TamaNet+.

### Reliability

- The only Net 'Patented' Original EDGE TO EDGE.
- Compatible with all round balers.
- Trialled and approved by all leading baler manufacturers.
- Our products' strength, length and all other measurements are annually checked and approved by DLG.

### Consistency

- Perfect bales every time.
- Effective coverage under all weather conditions.
- Suitable for all crops.

## Testimonials from the field

"After trying many brands over the past 20 years, I found Tama's netwrap to be the market's most consistent product and the best solution for both baler and farmer. TamaNet+ raises the bar even higher, by delivering unrivalled consistency and reliability."

**Michael Dunning, Thomastown, Ballydangan, Co. Westmeath, Ireland**

## Our leading technology works for you

### Guaranteed minimum length

Every roll contains the guaranteed stated length, not a "plus-or-minus" average.

### Lighter nets

Easier to carry and handle.

### Longer rolls

More bales per roll, less roll changes and greater efficiency.

### Environmentally optimized formula

Each bale is wrapped with less plastic material to reduce the environmental impact.

### Superior grip in all conditions

Ultimate connection between layers and strong tail security.

### Mesh lock technology

Eliminates the risk of net laddering.

**Product info**

| Name | Roll Length | Roll Width | Roll Diameter | Roll/Pal |

| TamaNet+ | 3800 m | 123 cm | 27.5 cm | 28 |
| TamaNet+ | 2800 m | 123 cm | 24 cm | 36 |

"Breakthrough Technology BALE LOK® Our latest development enabling 2.5 wraps per bale!"

# TamaNet+ ROYAL®

## 2.5 WRAPS PER BALE!

* Based on field trials which were carried on high-density crops that are usually baled with 4-5 wraps per bale.

## High density cereal crops and heavy-duty baling have always required at least 4-5 wraps, or even more... until now.

Introducing: TamaNet+ Royal®. 70 Years of innovative farming solutions brought to life with a first of its kind baling experience - Only 2.5* wraps per bale!

### Ultra cost effective

26% SAVED

Up to 26% saved on your costs per bale + enjoy over 50 bales more compared to the standard 3600 m netwrap.

### Faster than ever

40% LESS

Up to 40% less downtime - with an incredible, record-breaking 7.5 seconds of wrapping time per bale..

### Less plastic

45% LESS

Up to 45% less plastic per bale - That's 1000 m less plastic for every 100 bales!

## Heavy duty baling

- Tailor-made for high density cereal crops.
- Designed to withstand the highest pressure.
- Crafted to enhance your performance.

## Royal performance

TamaNet+ Royal® carries Tama's ultimate guarantee for reliable and consistent baling with all baler types, under any conditions.

THE FIRST MADE WITH PCR POST-CONSUMER RECYCLED MATERIALS

# TamaCycle

## A FIRST-OF-ITS-KIND ECOLOGICAL SOLUTION FOR CROP BALING PRODUCTS

## Tama Cycle Netwrap

This high performance netwrap is the latest step in our eco-baling revolution. By replacing virgin resources with recycled and reprocessed materials, Tama offers a first of its kind ecological solution for crop baling products.

After revolutionizing the baling industry by producing premium netwrap with much longer rolls and using less plastic per bale compared to other brands in the market, Tama is now taking a further step in its environmental revolution.

## Recycled to the core

All Tama Cycle Netwrap offers a high percentage of recycled materials:

## Tama Cycle Twine

Tama's heavy twine has long set a quality benchmark of adjusting the right twine to the right baler and conditions, and now it's time for another incredible breakthrough.

Tama Cycle enjoys all the benefits and qualities of type 130 twine, with another major environmental benefit:

**Twine manufacture includes significant percentages of Post-Consumer Recycled material.**

When it comes to Twine

# TamaTwine+

## WE'VE GOT YOU COVERED

## Maximize your baling performance

We understand your need for reliable and consistent baling. Thats why TamaTwine+ for Large Square Bales features extra pack length so you can enjoy:

**Higher output, Better efficiency, Less waste.**

- Guaranteed minimum length
- Special uv light inhibitors
- Spool identification (traceability)
- Unrivalled knot performance
- Less plastic per bale
- Less wear & tear

## Testimonials from the field

"TamaTwine+ is not only very strong, but also less thick, which leads to the creation of good knots in the baler. The product works great, and handles more loads than other twines I've tried."

**Jeppe Bang Jensen,**
**Morten Bang Jensen Farm, Denmark**

TamaTwine+

IMPAX™

TECHNOLOGY INSIDE

## New baling technology

**Tama is proud to introduce the next generation of baler twine with Impax technology.** Impax technology twine is formulated to provide unparalleled baling efficiency and built to withstand the shock load exerted on the twine during bale ejection. This characteristic guaranteeing secured knots and unrivaled knot performance.

# TOTAL WORKABILITY.

Formulated to provide unparalleled baling efficiency, IMPAX™ Technology twine structure is purpose built to withstand the shock load exerted on the twine during bale ejection, guaranteeing secured knots and unrivalled knot performance.

**UNMATCHED BALER OUTPUT**
More bales

**RECYCLABLE & SUSTAINABLE**
Reduced carbon footprint

**SUPERIOR KNOTTING PERFORMANCE**
Less downtime

**LESS WEAR & TEAR**
Major savings

**KNOT PROTECTION**
Peace of mind

## Testimonials from the field

**“Broken twine is a big issue in our industry.**
It’s a fantastic advantage to us to have twine that doesn’t break. It’s been very successful for us”

**“The quality of the product out the back of the baler matches the twine - its really good!”**

# Maximize your baling performance

EXCEPTIONAL

## Impax | HD Ultimate

The best solution for all other HD balers in harsh conditions

EXTREME

## Impax | HD Prime

The “all around player” for all HD balers in all conditions, and the longest spool ever made.

EXTREME

## HD Prime | HD Prime XL

Tama’s strongest twine, HD Prime ensures reliable and consistent performance under the most challenging conditions.

VERY HIGH

## HD Extra | HD Extra XL

A high-density solution designed for difficult crops – such as Barley straw– under harsh conditions, HD Extra is a cost-efficient twine with the same performance as Type 110 twine.

HIGH

## LSB Power | LSB Power XL

Designed for all baler densities, LSB Power offers the same resistance and performance as Type 130 twine.

STANDARD

## LSB Long

A cost-efficient solution for lower density forage baling,  LSB Long is similar to Type 150 twine.

LOW

## LSB Max

Offering more meters per spool than any other big baler twine, LSB Max is designed for lower density bales such as hay for livestock.

When it comes to Silobags

IpesaSilo®

# WE'VE GOT YOU COVERED

After revolutionizing the market with the ultimate crop baling solutions, Tama is happy to bring you also the ultimate crop storage solution.

**Grain bags made by the No. 1 producer in the world – IpesaSilo.**

IpesaSilo provides a formulation designed to bear the extra stress that grain submits on the film.

This global collaboration enables you to enjoy a top-quality product, ensuring consistency, complete reliability and high performance for non-stop and trouble-free harvesting, supported by a trustworthy supply chain, professional knowledge and top-quality service and support.

So, if you're a farmer, grain elevator, or trader, with Tama and IpesaSilo you get all the benefits:

## Reliability

- Superior strength, better tear resistance, and extreme durability.
- Optimum preservation.
- Protection for 18 months in Grain Bags & 24 months in Grain Reinforced Bags.
- A more efficient global supply chain.

## Flexibility

- Unlimited storage.
- Store it anywhere.
- Simplified logistics.
- No need for urgent transportation.
- Enables freight rationalization.
- Enables a new and better trading position.

## Efficiency

- Total segregation and traceability of the stored grain.
- Suitable for all weather conditions.
- Easy to handle.
- Easy to recycle.
- Make your high cost, existing facilities more efficient and profitable.

# SUPPORTING YOUR SUCCESS

## As farmers, we understand your need for assistance.

Every farmer needs support at one time or another to achieve the best results. Since our founding 70 years ago, Tama has accumulated extensive know-how and experience and we're happy to share those assets with you to help improve your baling performance and your business.

Our dedicated, online support service - Tama Assist, is available to farmers throughout the year - anytime, anywhere. So if you need an answer to a technical question about baling, a tip for taking care of your baler, or advice on using one of our solutions, Tama Assist is here to help you.

**Tama Assist - We support you, your products, and your business.**
**www.tama.co.il/tama-assist**

# THE PERFECT MATCH

## Partnering with Leading Baler Manufacturers:

As farmers, we understand your need for compatibility.

Tama maintains long-term partnerships with the world's leading original equipment manufacturers (OEMs). From machine and wrapping development, through product approval and recognition, to crop baling product distribution, all aspects of the business are covered in our OEM agreements.

In this way, we ensure that our solutions seamlessly integrate with the baler of your choice.

# Together we grow
# FOR CHANGE

### Our commitment to the environment

Founded by farmers, Tama maintains an unbreakable bond with the land. As the global Crop Baling Solutions leader, it's our responsibility to lead an industry-wide revolution to a more sustainable and effective use of materials, for the sake of our environment, ensuring that future generations inherit this bond.

## OUR VISION

**Tama aims to be the world's most efficient crop baling producer - By 2025**

### COLLECT
The following quantities of used crop baling products

| 50% | 50% | 90% |
|---|---|---|
| Netwrap | Twine | Cotton |

### RECYCLE
The plastics in Tama products to a minimum of

| 10% | 30% | 20% |
|---|---|---|
| Netwrap | Twine | Cotton |

### REDUCE
The use of virgin plastics in our products by

| 3% | 20% | 10% |
|---|---|---|
| Netwrap | Twine | Cotton |

# OUR COMMITMENT FOR CHANGE

## REDUCE

### Tama Netwrap and Twine reduce the amount of plastic used per bale

**TamaNet+**

Save 218 kg of plastic compared to standard netwrap.

* When making 5,000 bales with a diameter of 1.70 m and 3 wraps of the bale.

**TamaNet+ Royal**

Only 2.5 wraps per large size bale (1.80m) significantly reduces our environmental impact: 45% less plastic per bale.

**TamaTwine+**

Save 570 kg of plastic and 57 shrink packages with 10,000 bales*

* Same crop, same size, TamaTwine uses up to 25% less plastic
* The comparison is between Tama LSB Power 140m/kg and Standard twine 130 with 115m/kg
* When baling 10,000 bales this saving amounts to approximately 57 less shrink packages and twine pack strappings

## RECYCLE

### We are increasing the Re-use of recycled raw materials coming from 3 sources:

1. All waste materials from all Tama production sites.
2. Recycled raw materials made from products which are NOT used for crop baling
3. Recycled raw materials made from recycled crop baling products.

## REPLACE

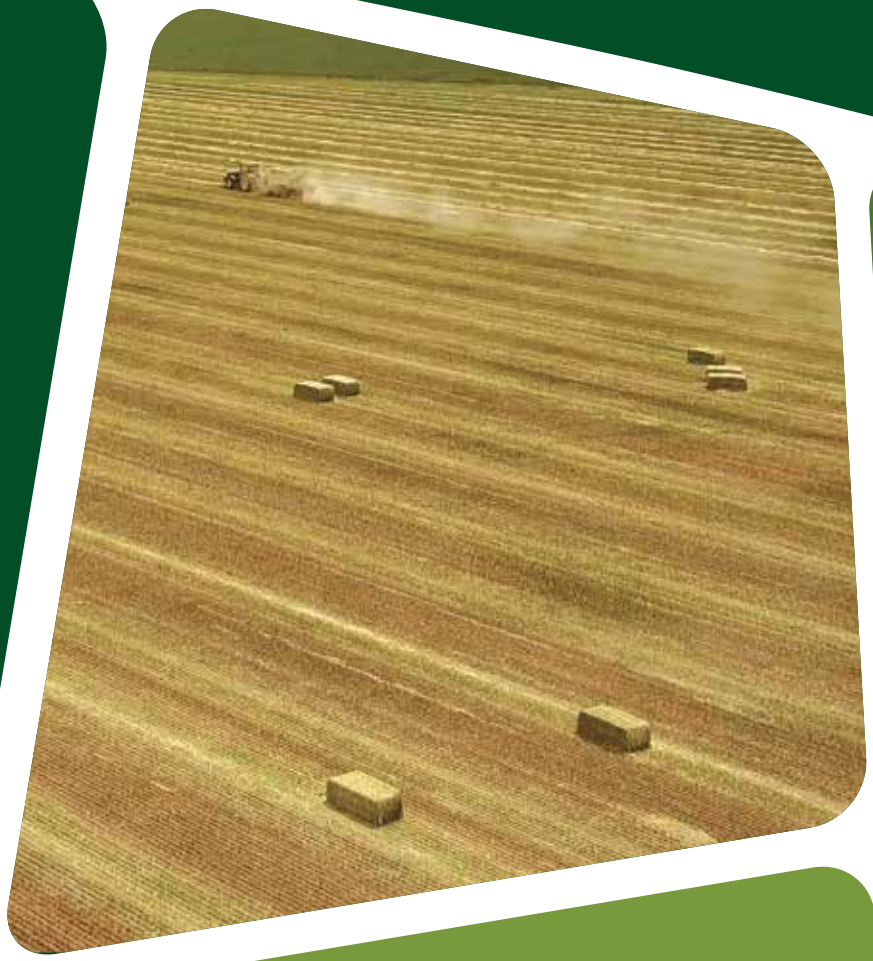

Investing in innovative technologies that will enable alternative plastic-free solutions for the crop baling industry.

## COLLECT

Together we aim to maximize the recycling of Agri-plastics after they have been used in the field. Tama Group is proud to support a multitude of collection schemes around the world, which collect and recycle plastic from the field:
